# **HIGH-FIDELITY PROTOTYPE**

## **CHANGES MADE UPON USER EVALUATION**

Left Screenshot : Old UI

Right Screenshot: Updated UI

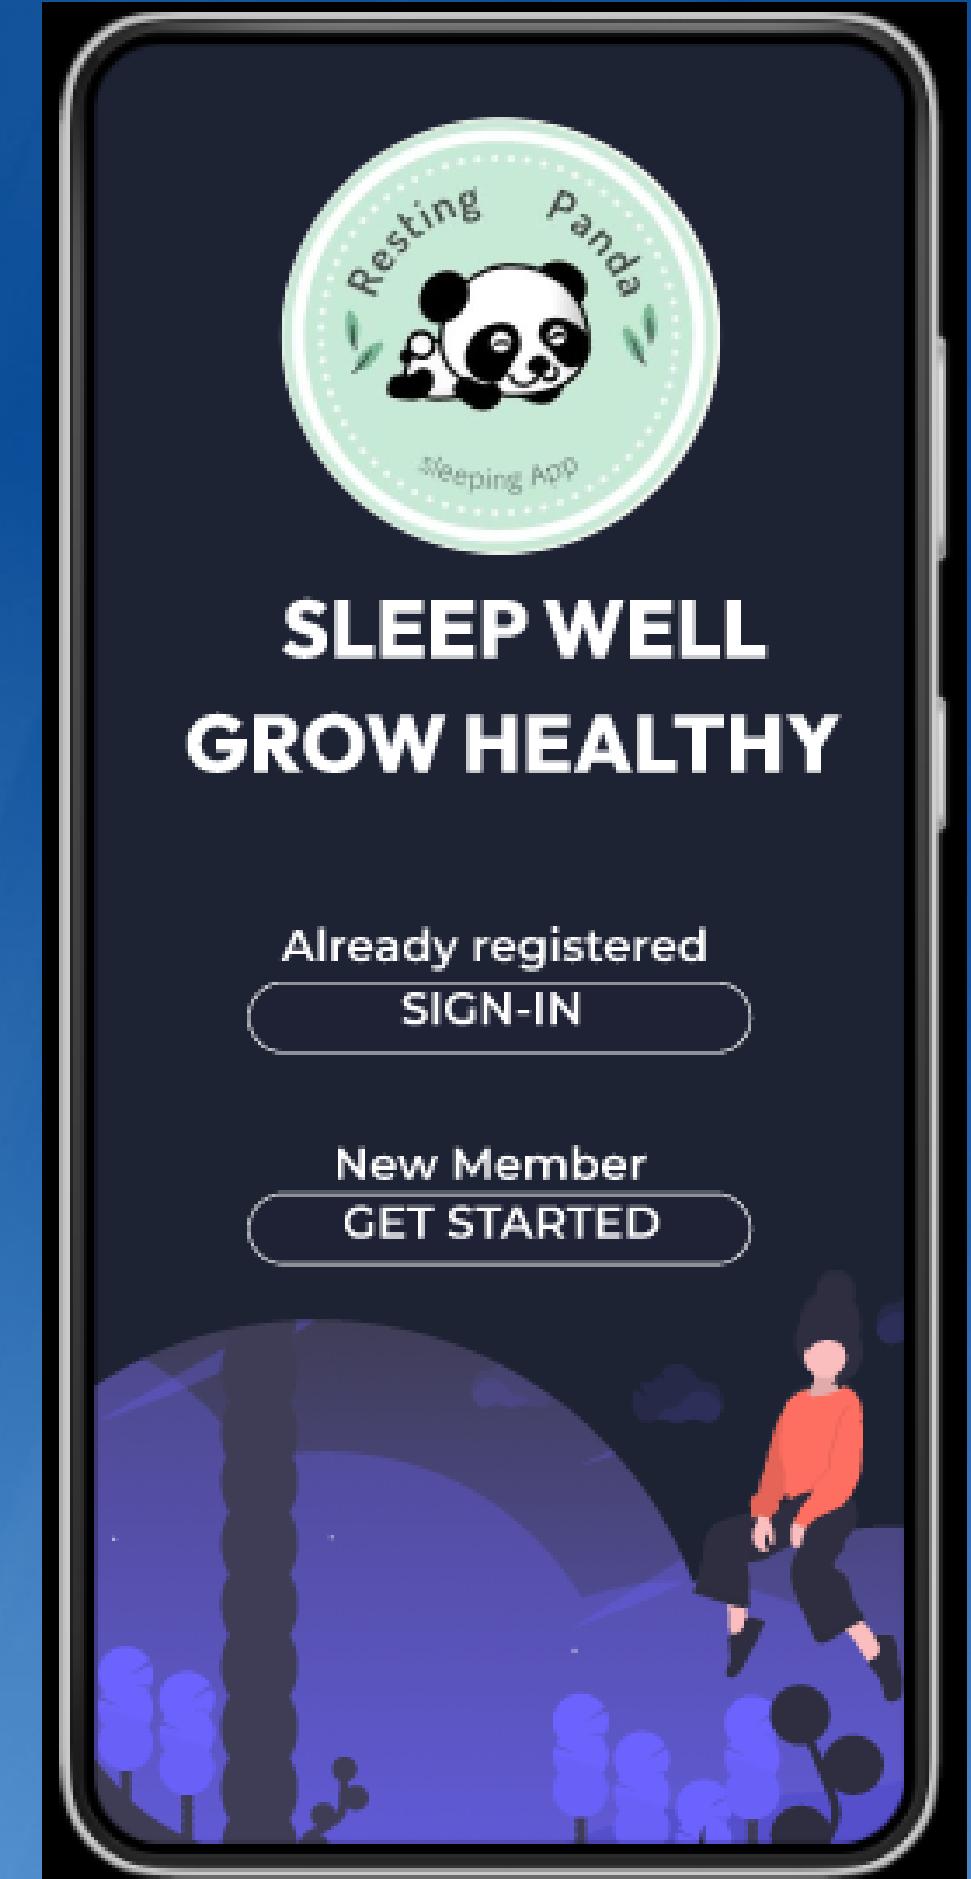

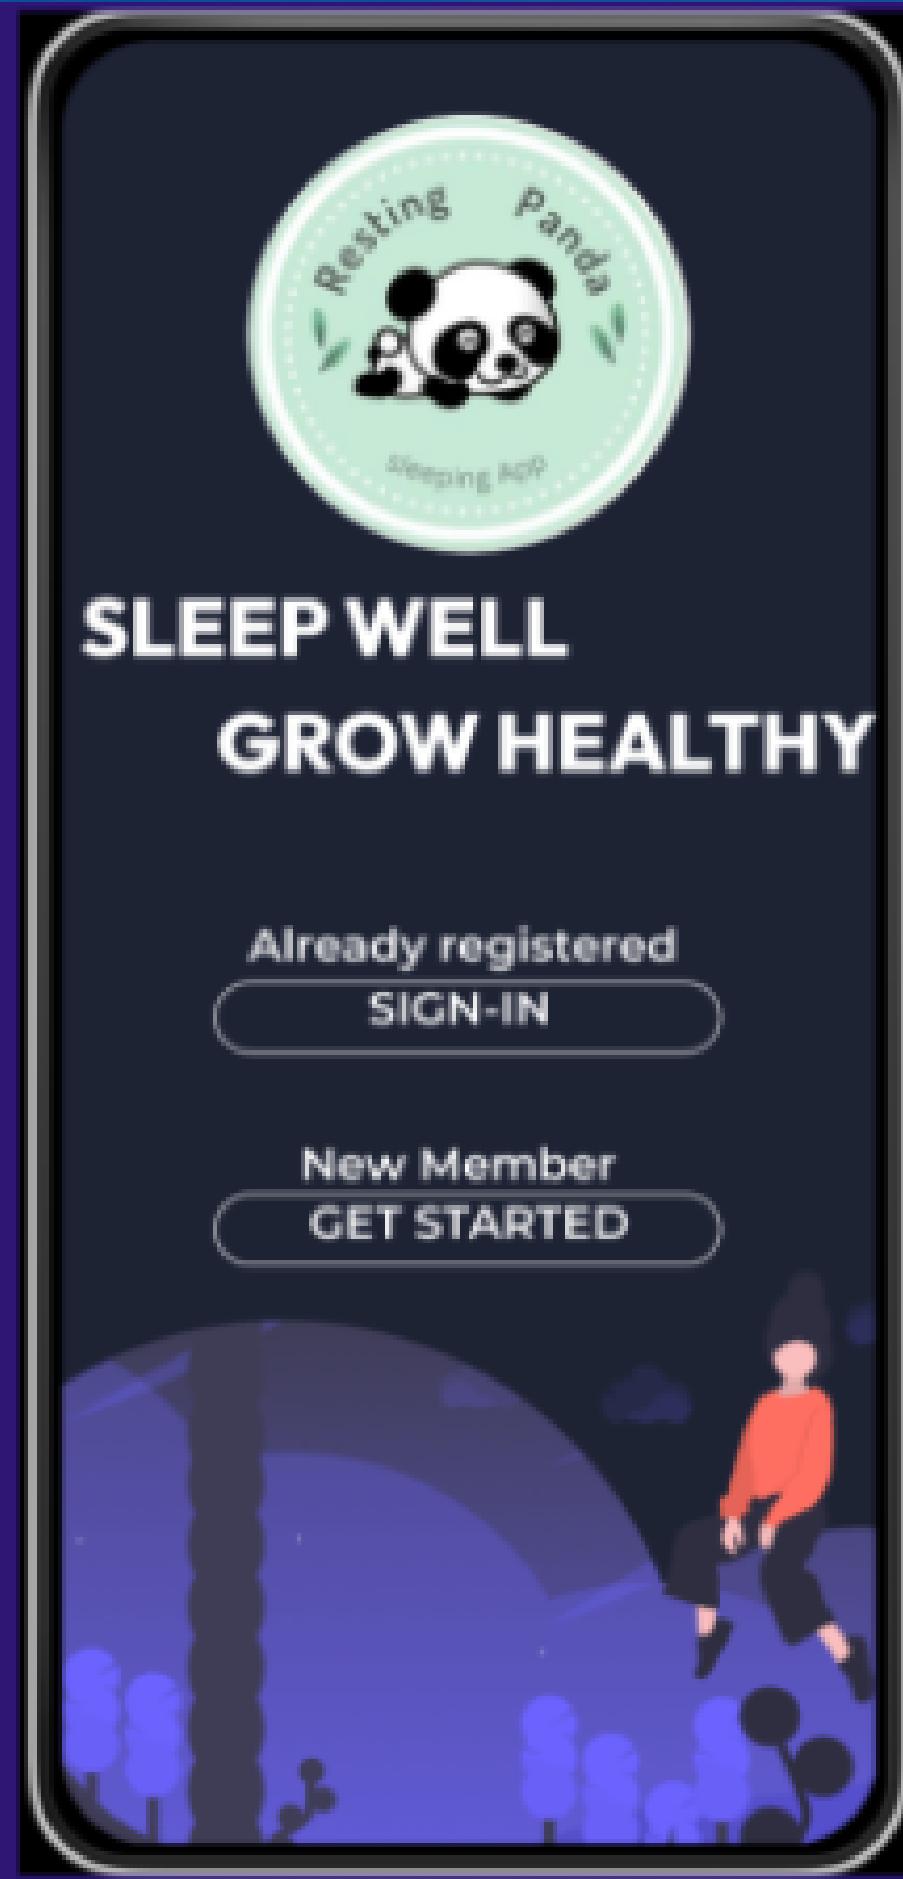

User clicks on Sign-In option to get app started

## USABILITY ISSUE

User pointed mistake of blurring layer of Sign-in and Get started as well as indentation of heading

## IMPROVEMENT

The blurred layer of text written in the interface was removed and indentation was made perfectly

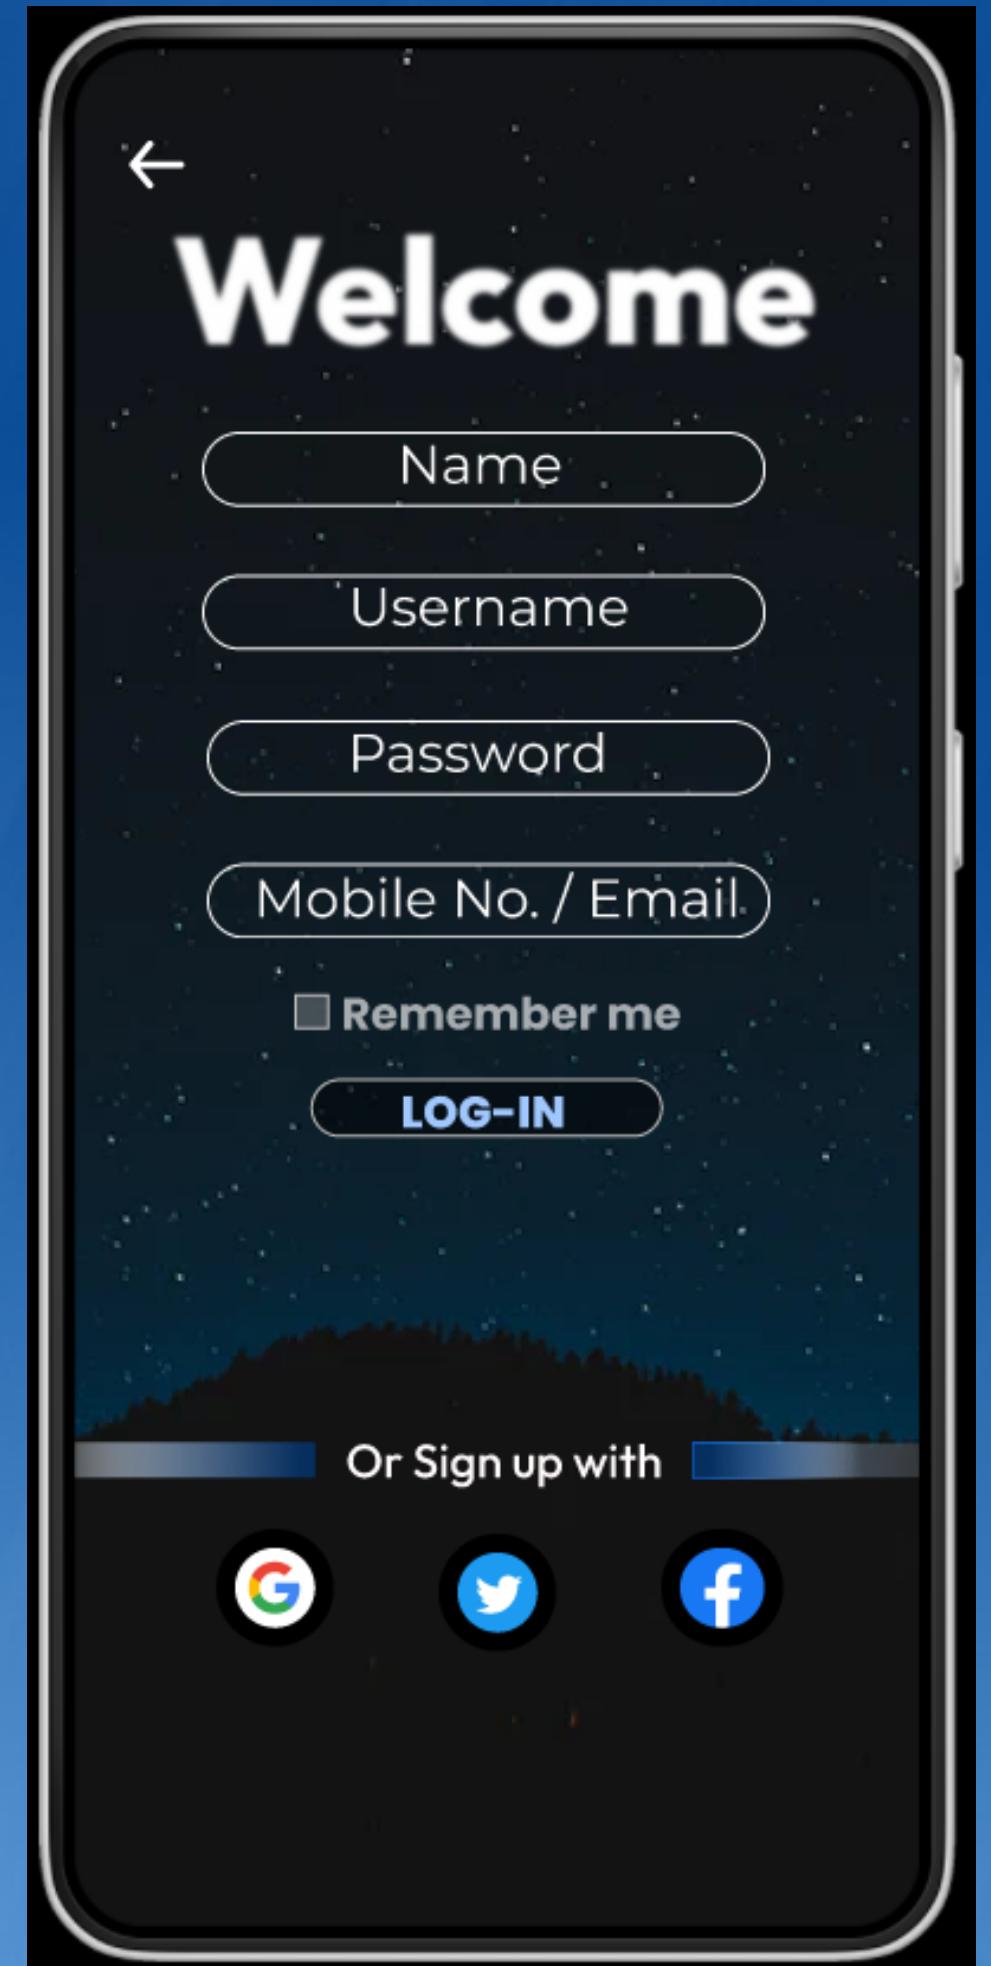

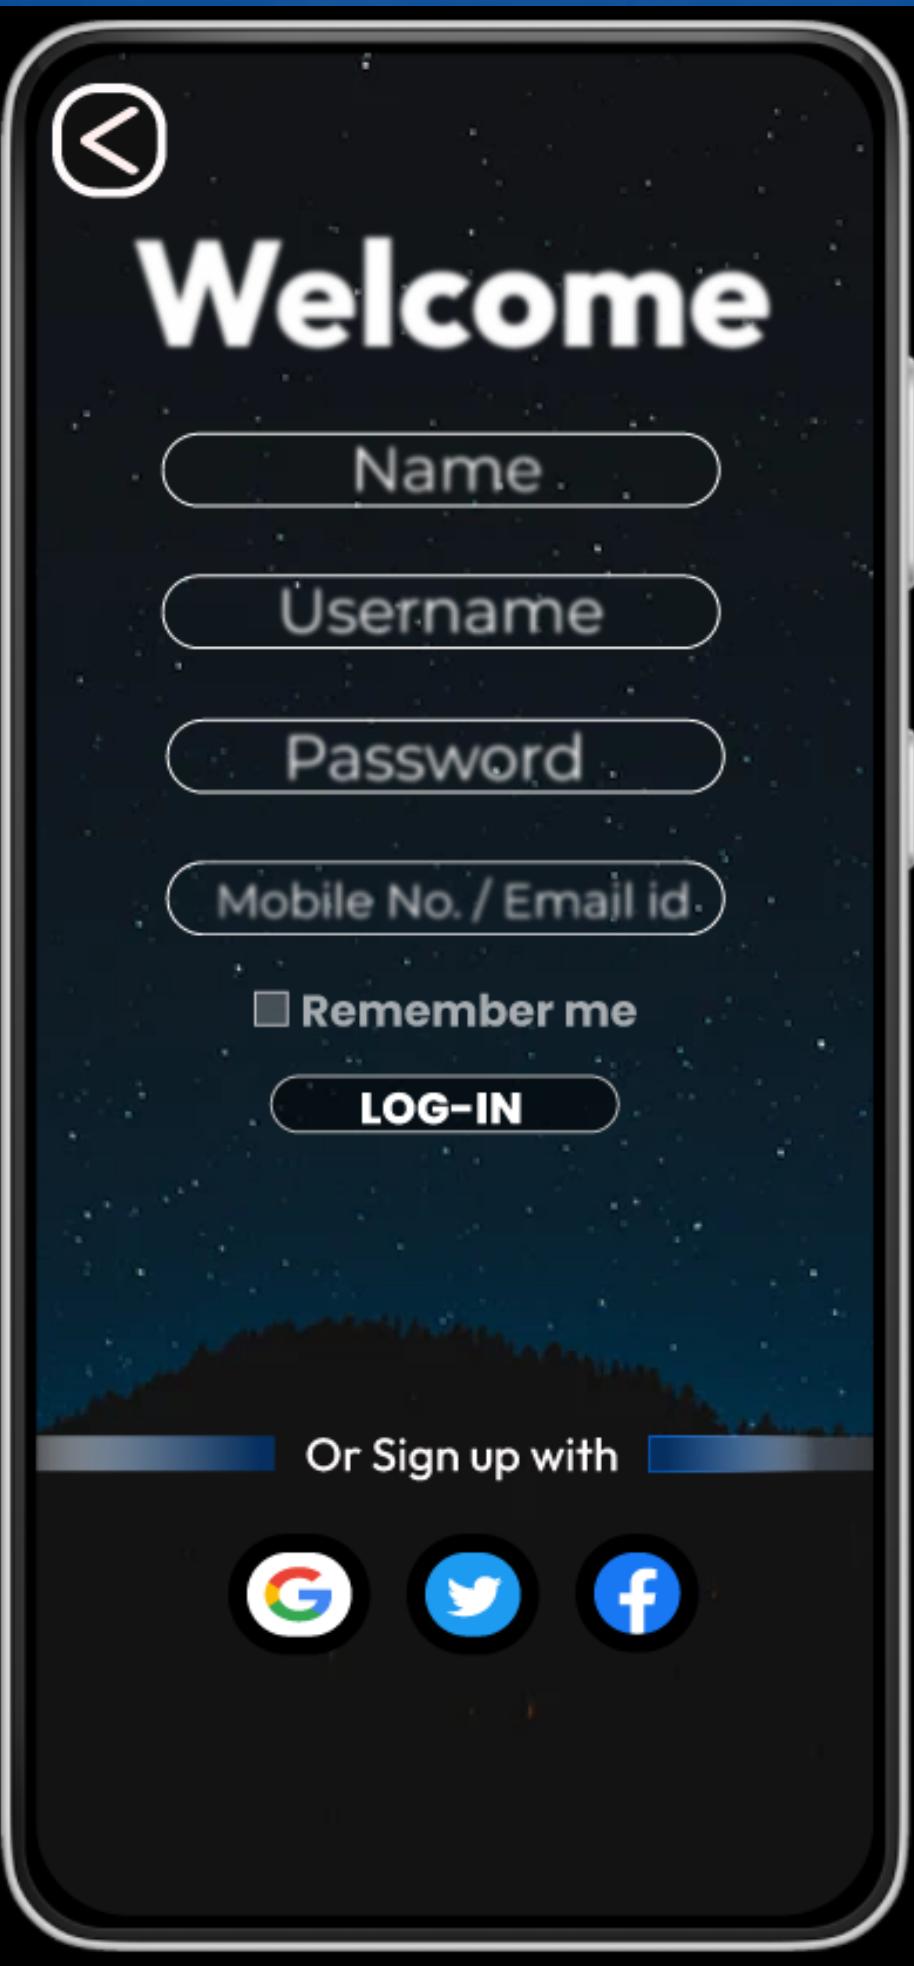

User fills all the required details or Sign-Up using different options available

## USABILITY ISSUE

The "LOG-IN" option was white in color.  
According to the user, it could be converted to a different color as to highlight that option.

## IMPROVEMENT

The "LOG-IN" text color was changed to blue which looked different and similar to our main theme color.

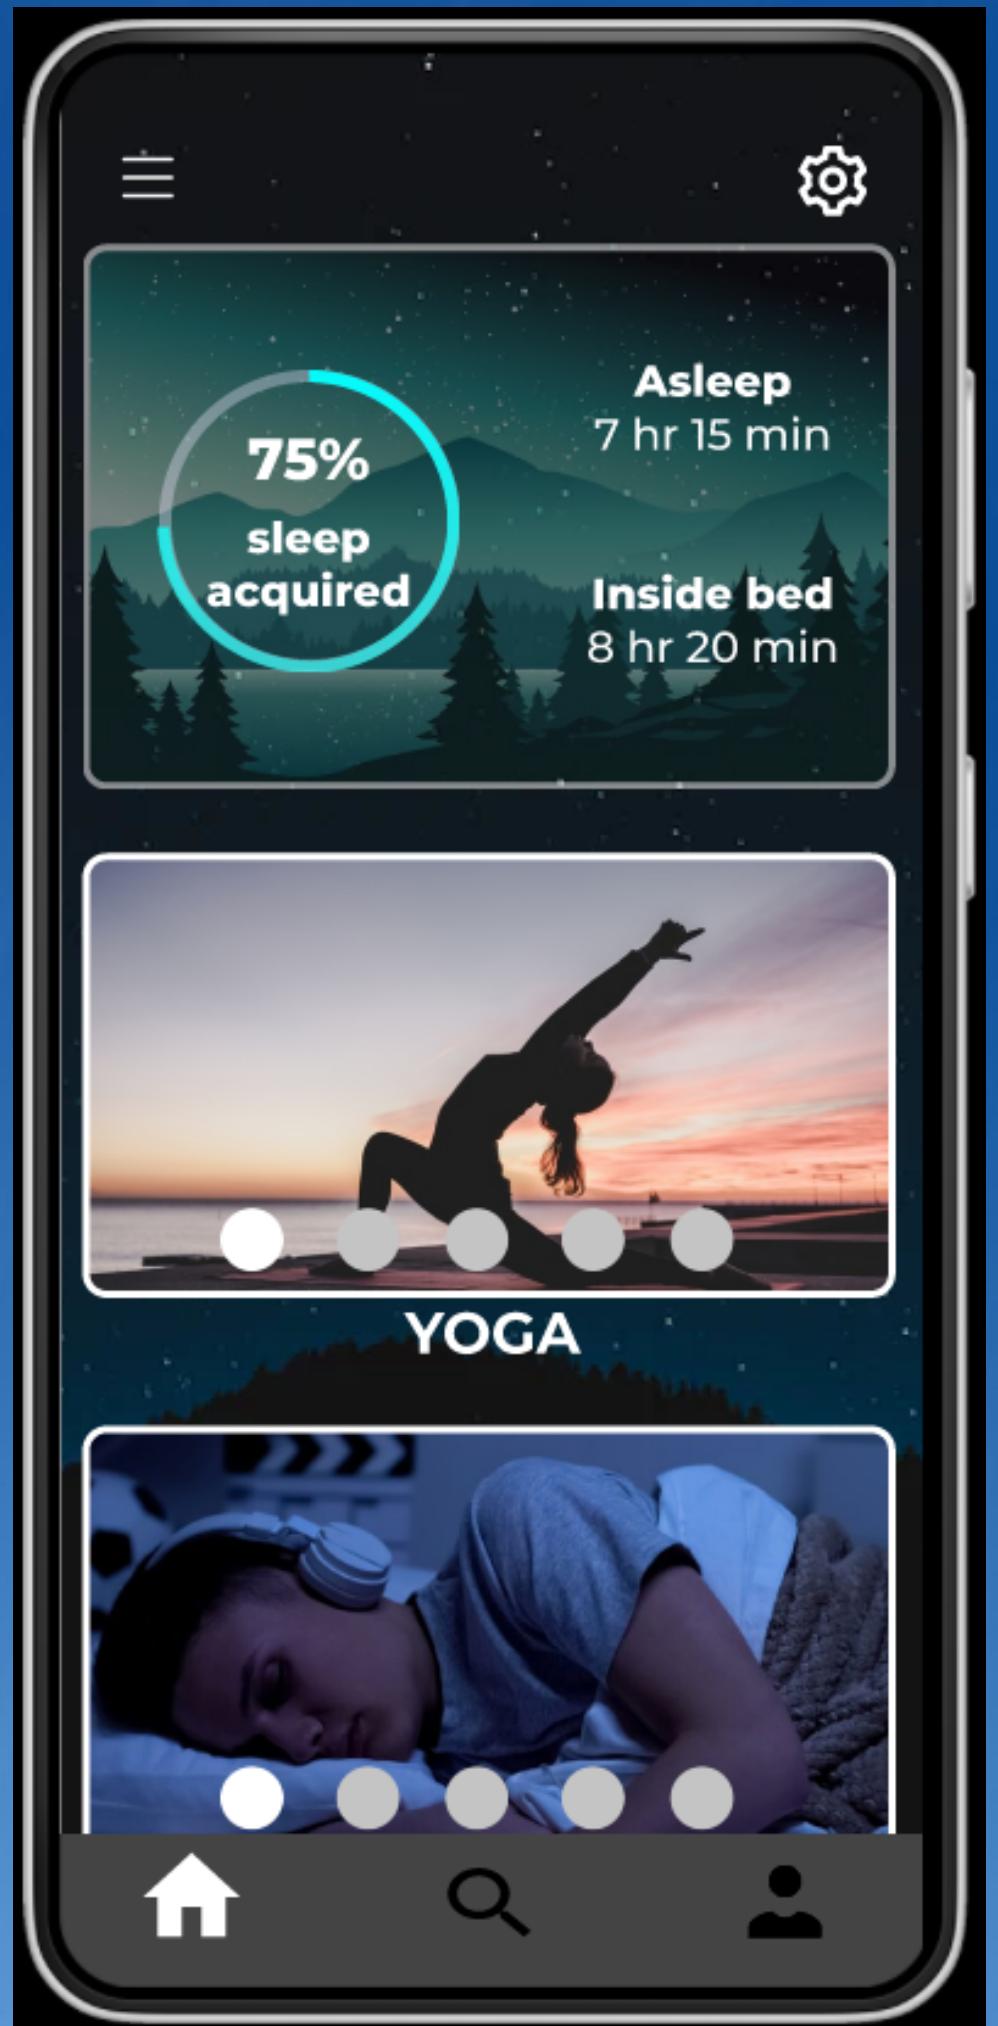

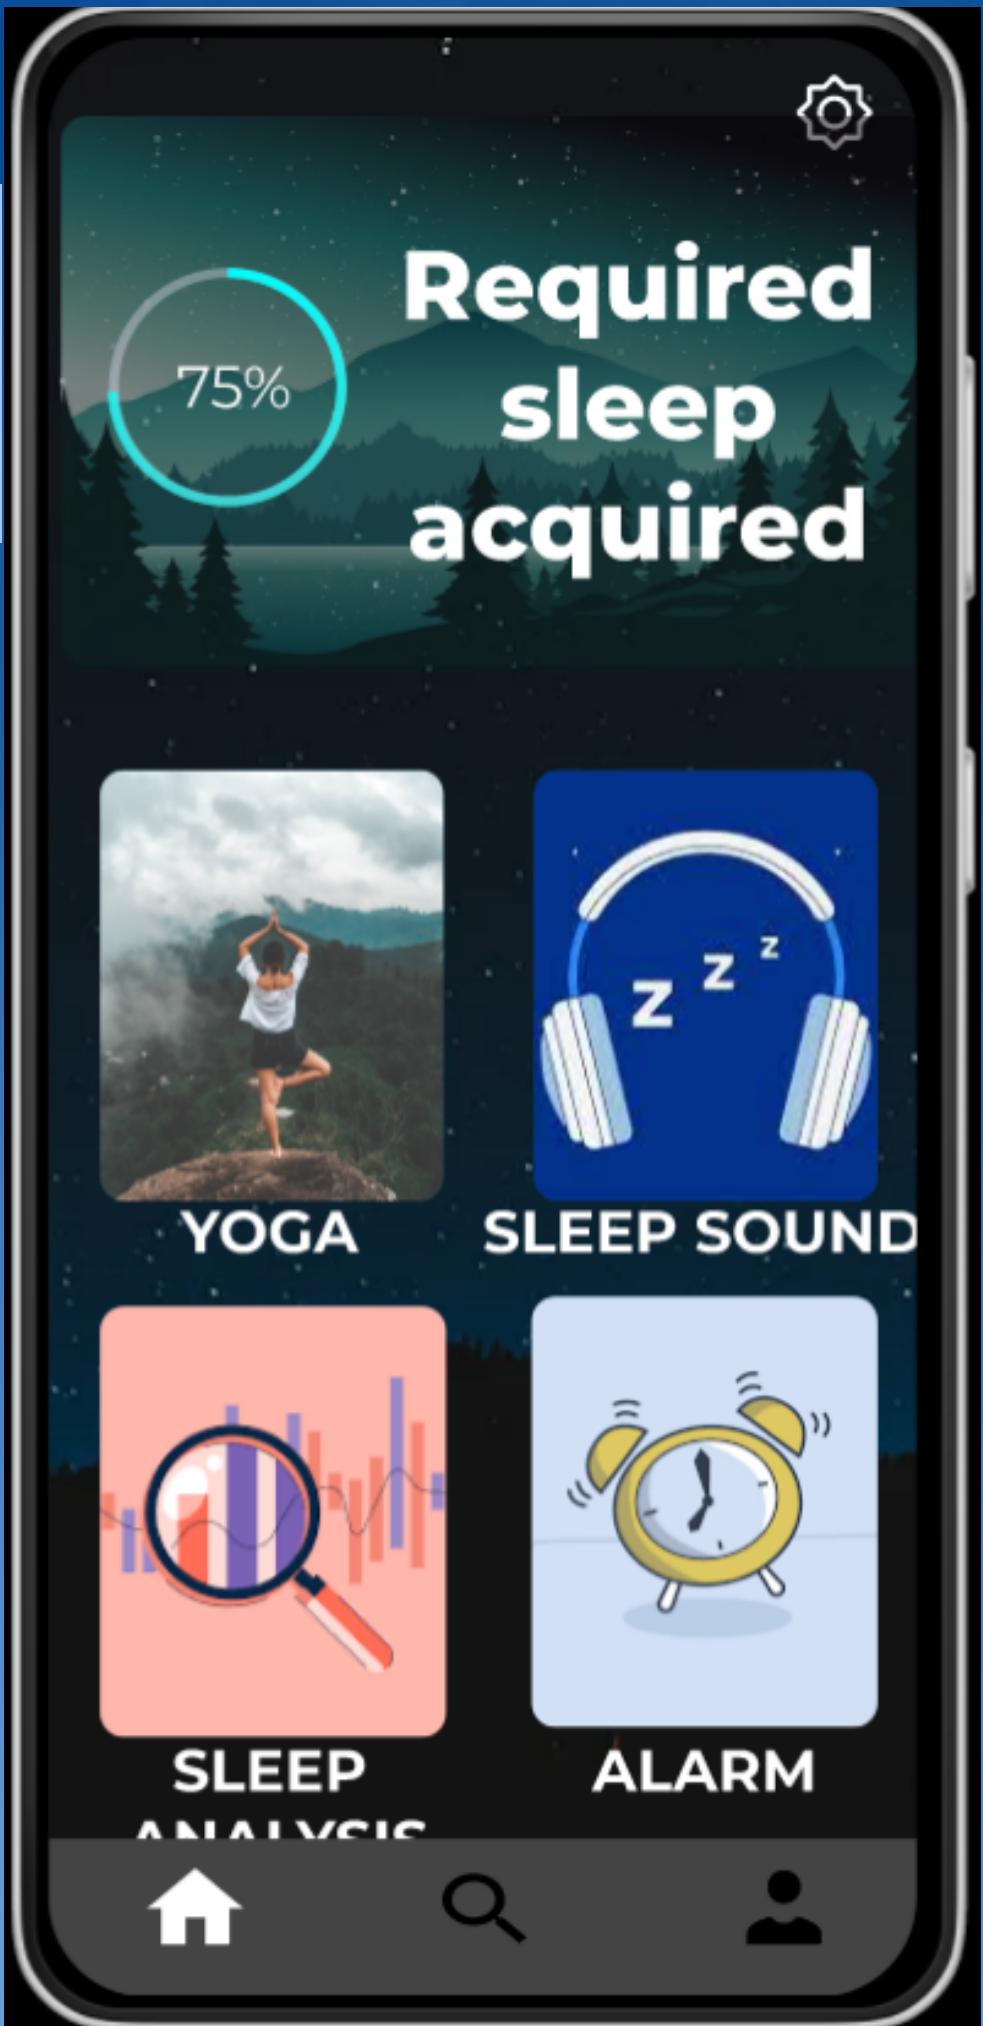

Home-page contains all the features of our app and user can click on icons and get task fulfilled.

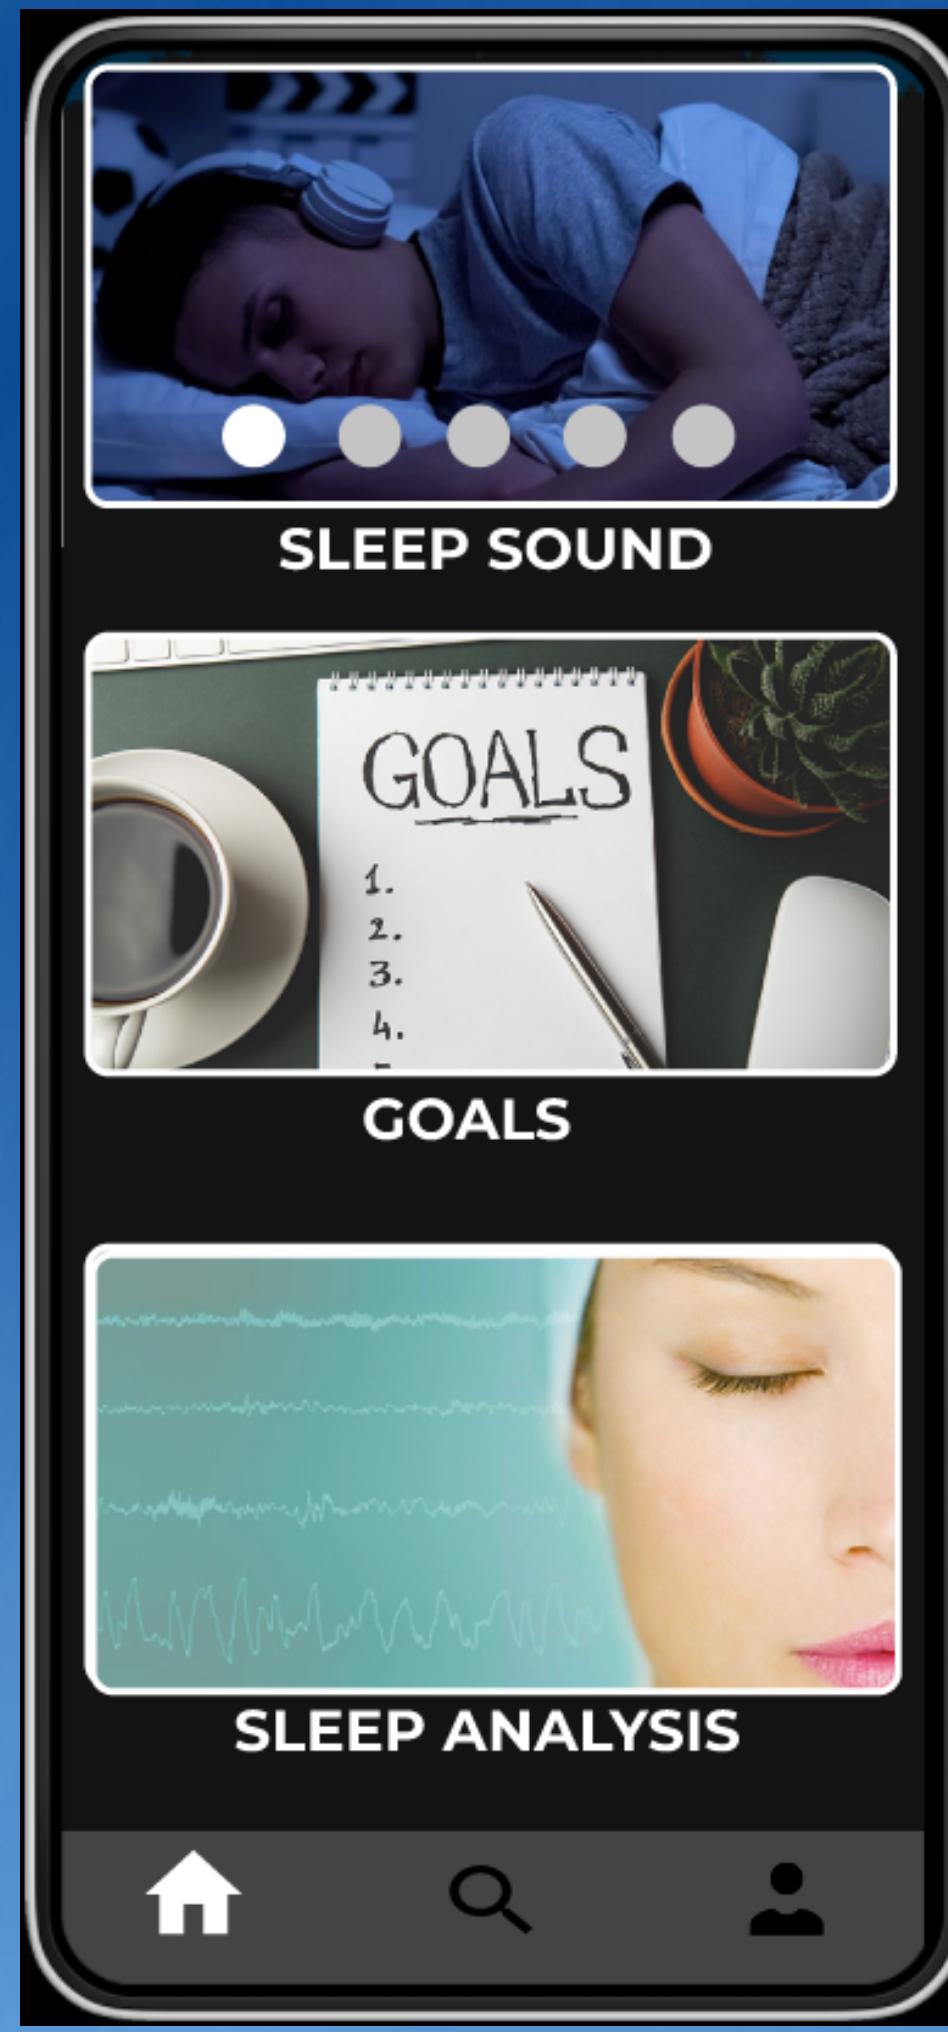

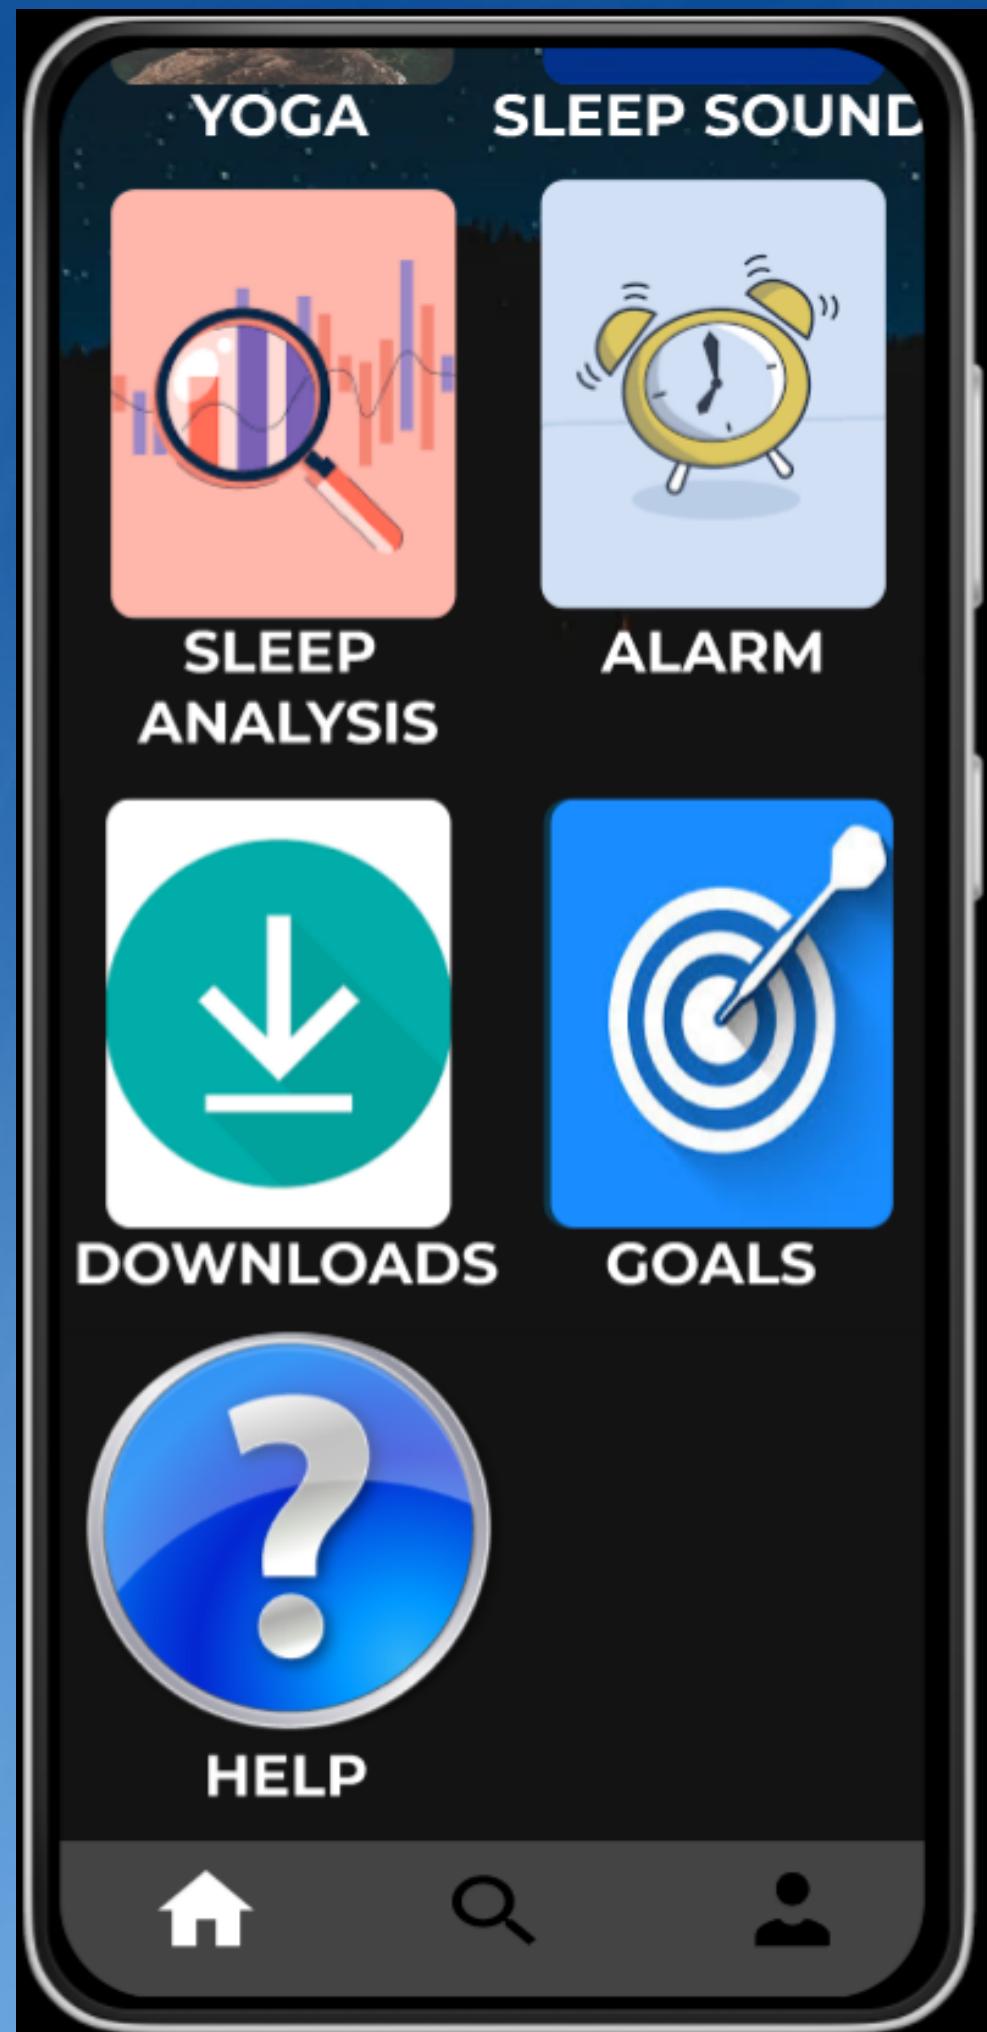

## USABILITY ISSUE

Icons were way too large and some were animated and some were real. User suggested to add hamburger

## IMPROVEMENT

Hamburger section was formed which included additional features of app as well as icons were made realistic and presented in more user friendly manner.

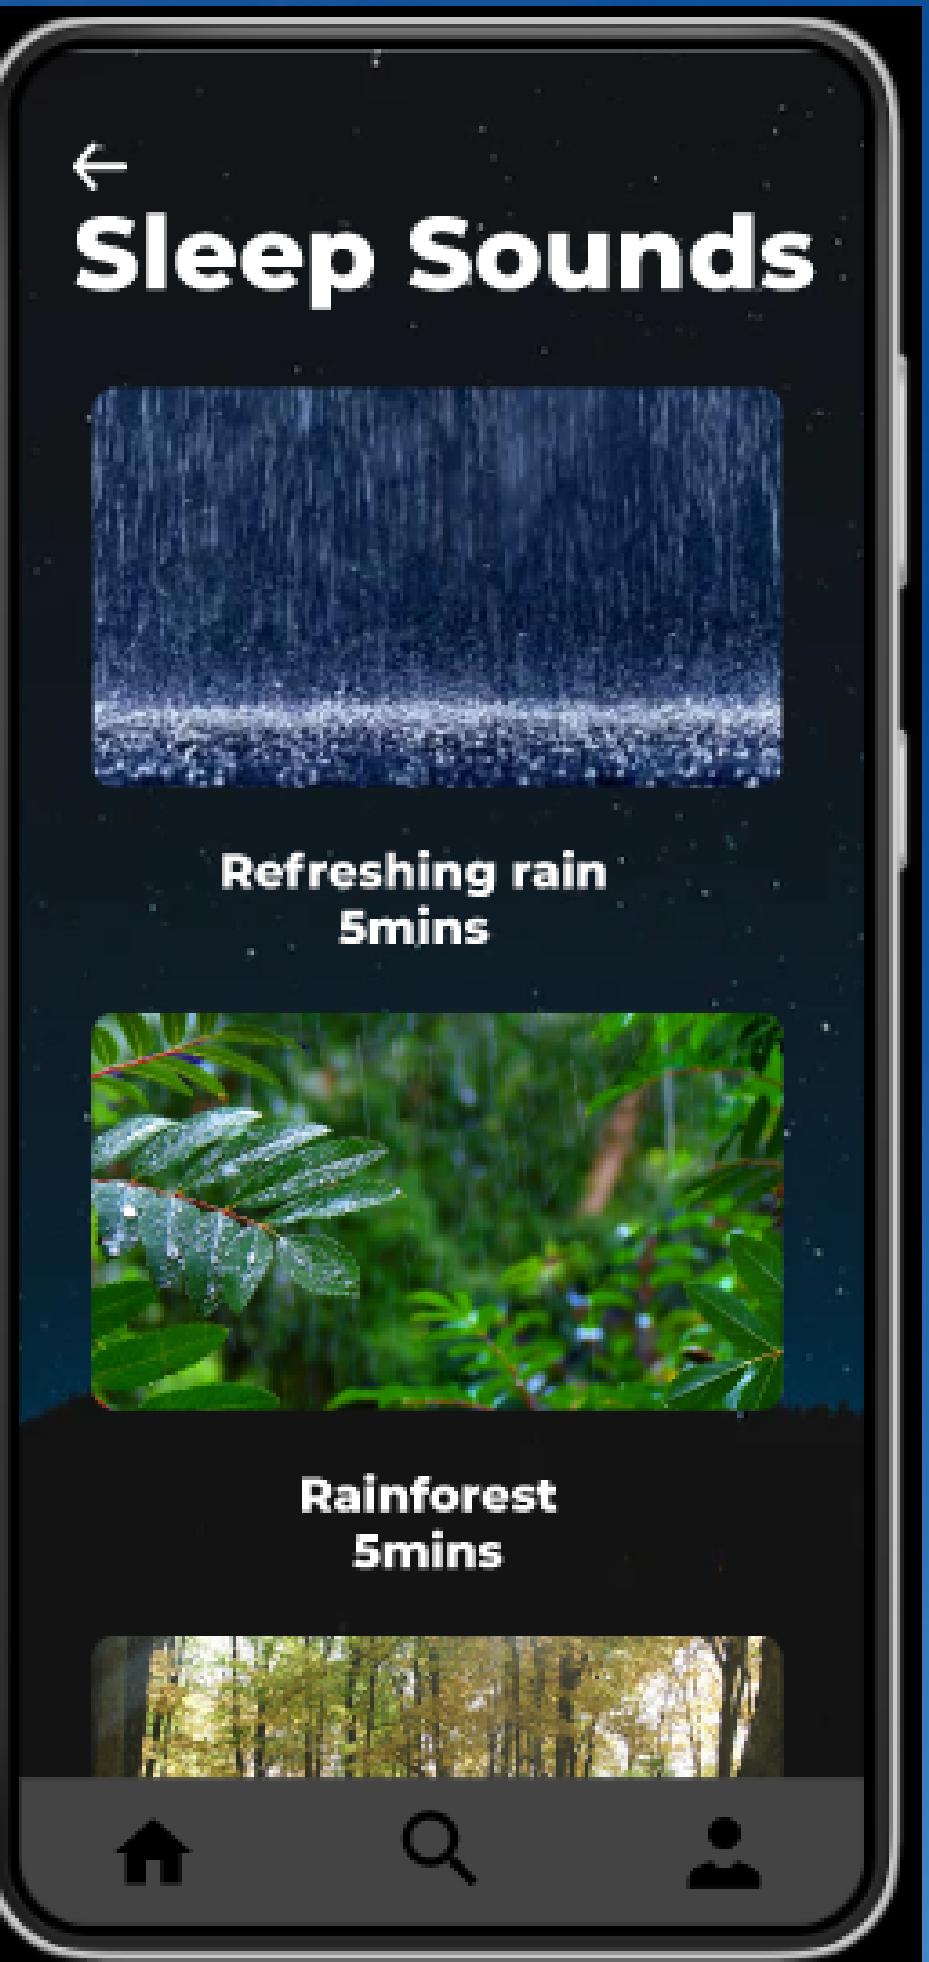

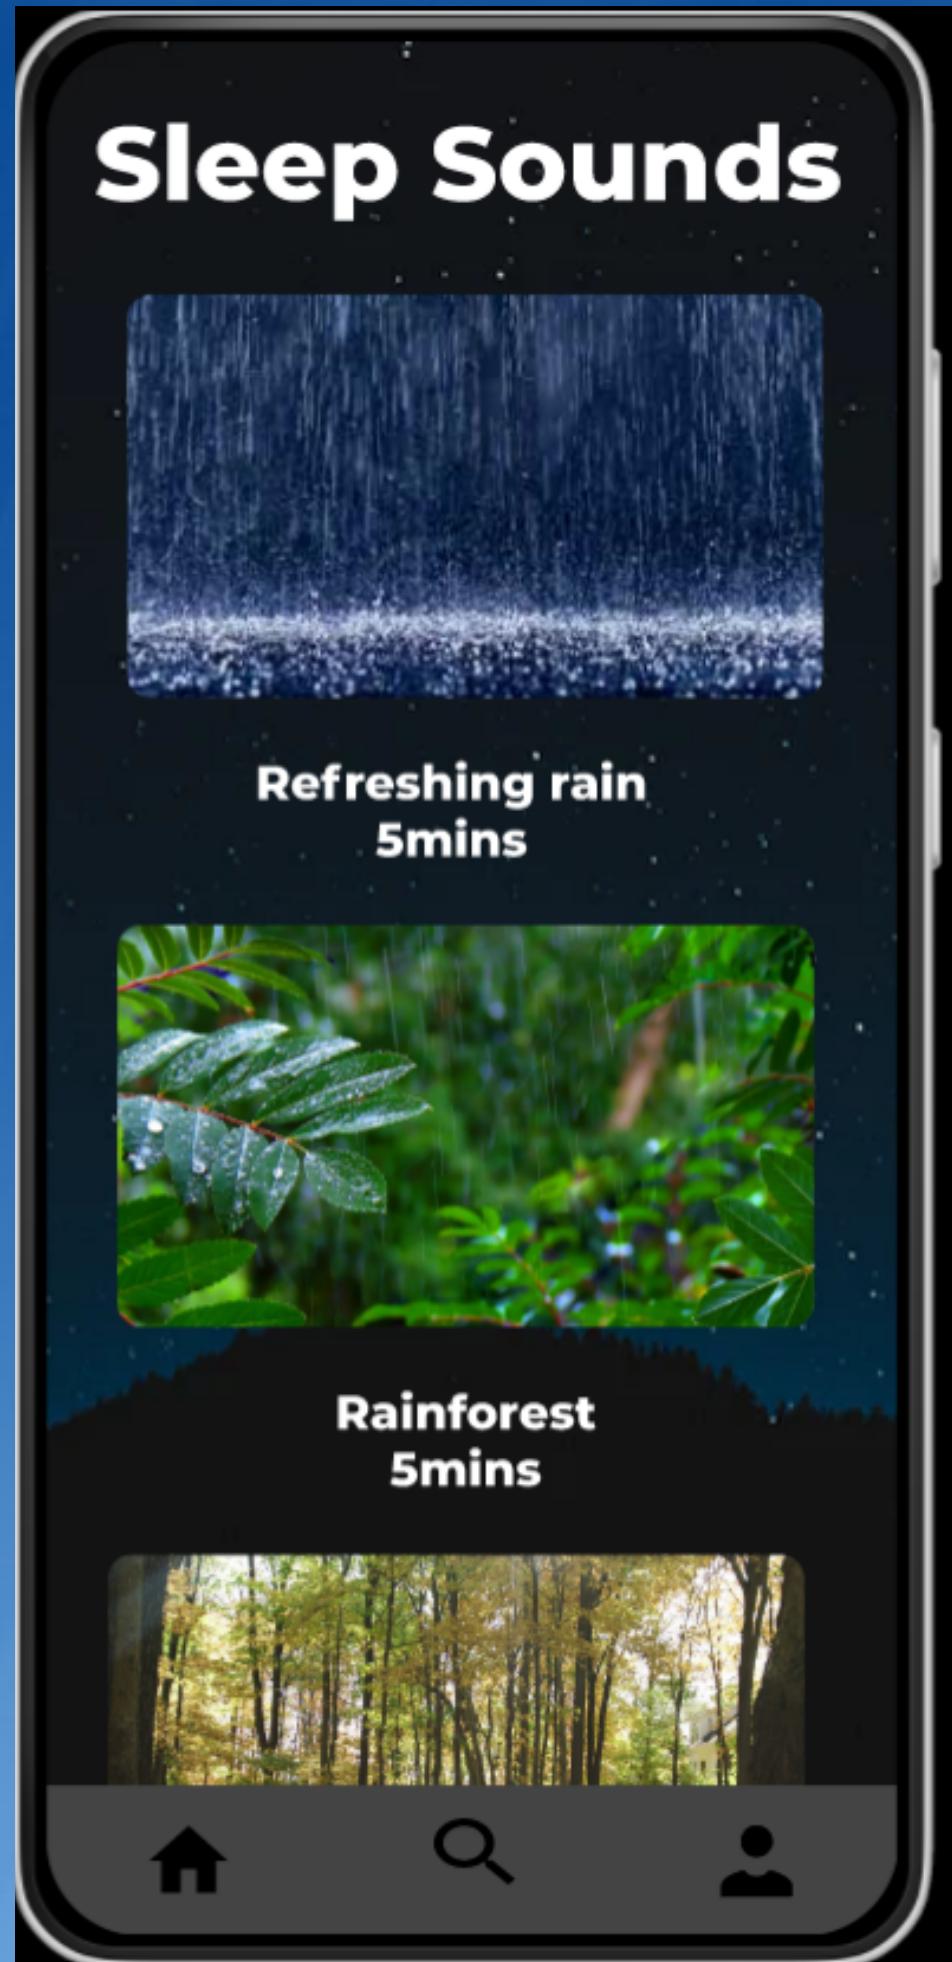

User clicks on the sleep sound feature and further clicks on any sound to get a peaceful mind and sleep.

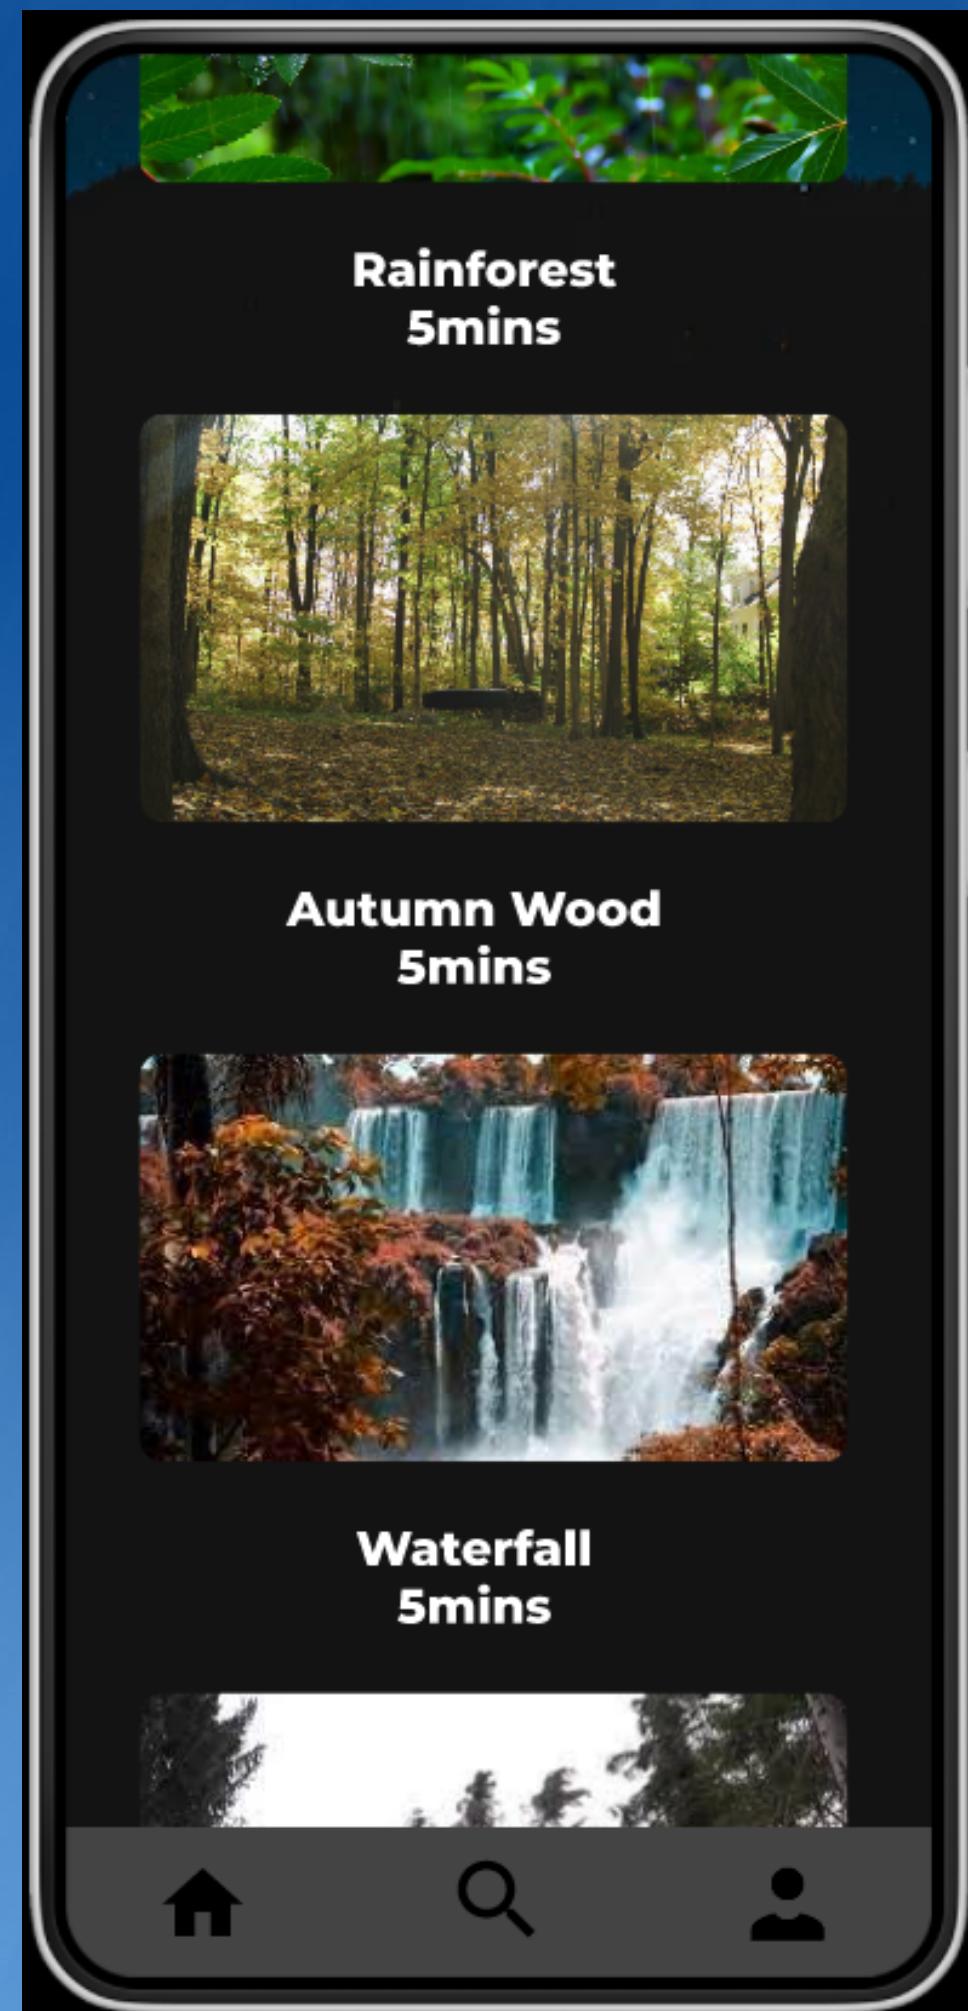

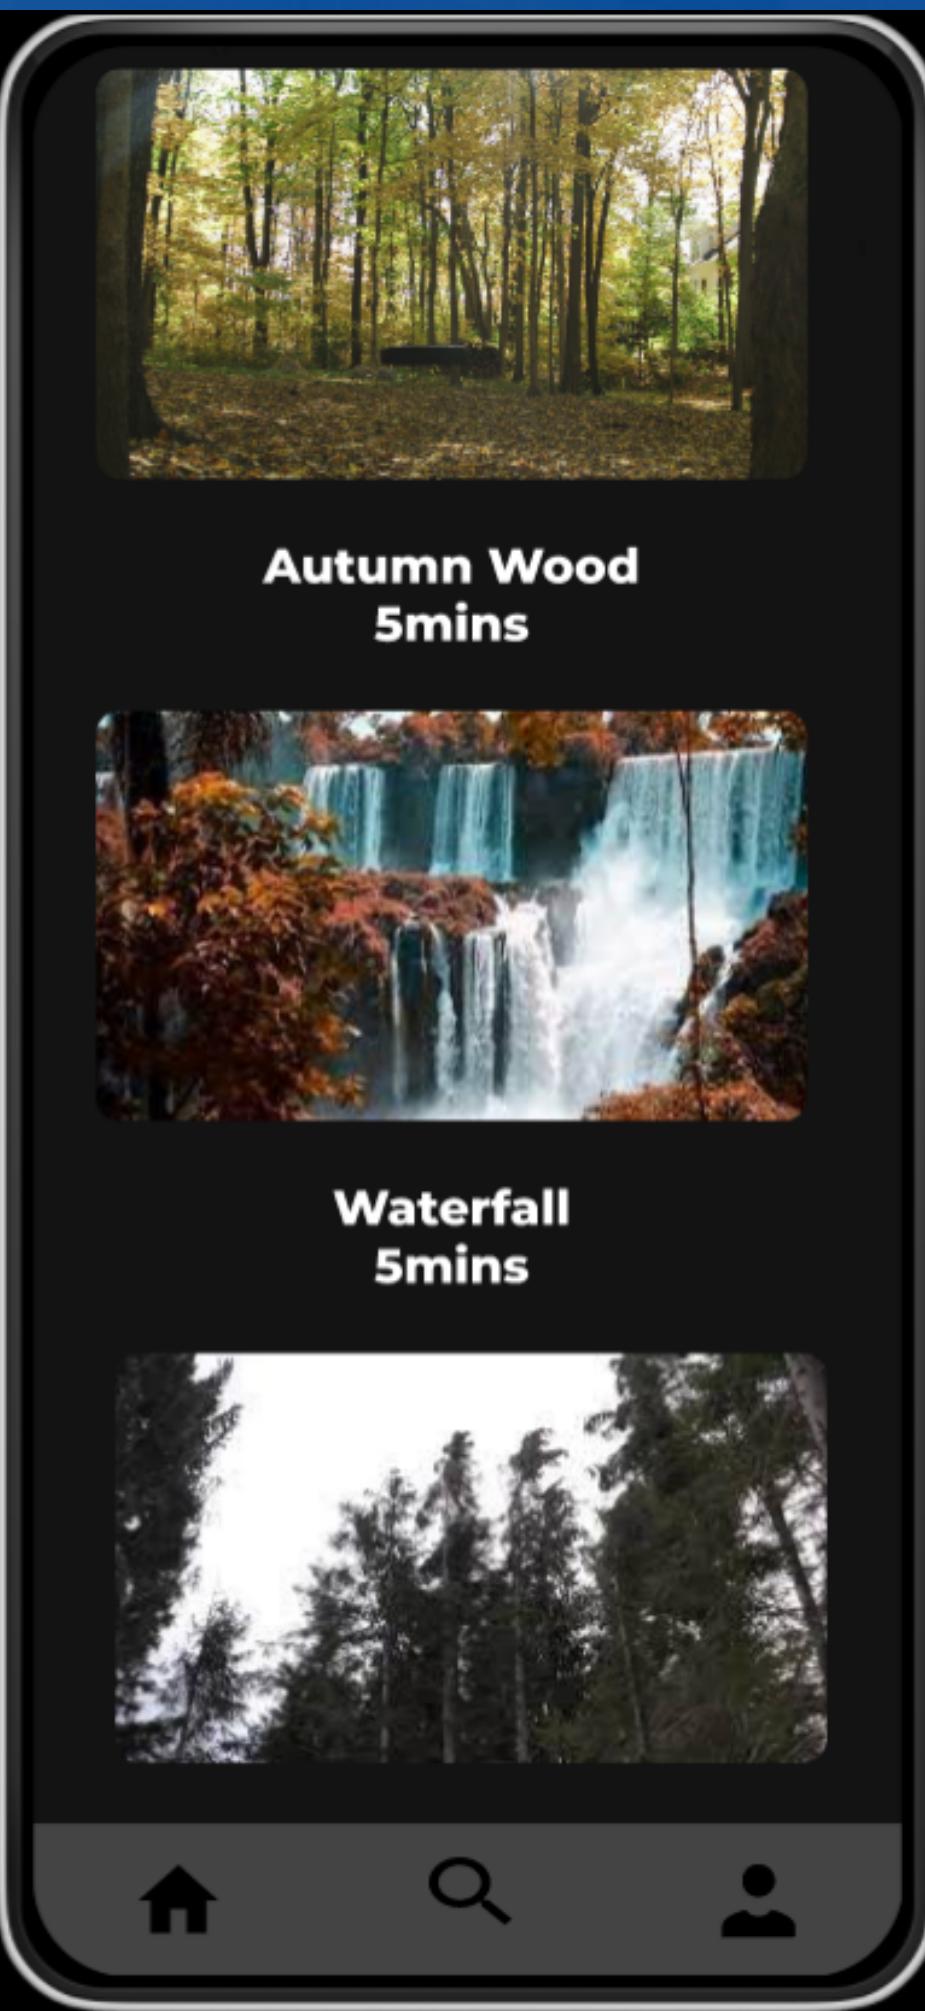

## USABILITY ISSUE

A back button option was missed from this page.

## IMPROVEMENT

Back button option was made available and it's prototyping was done too.

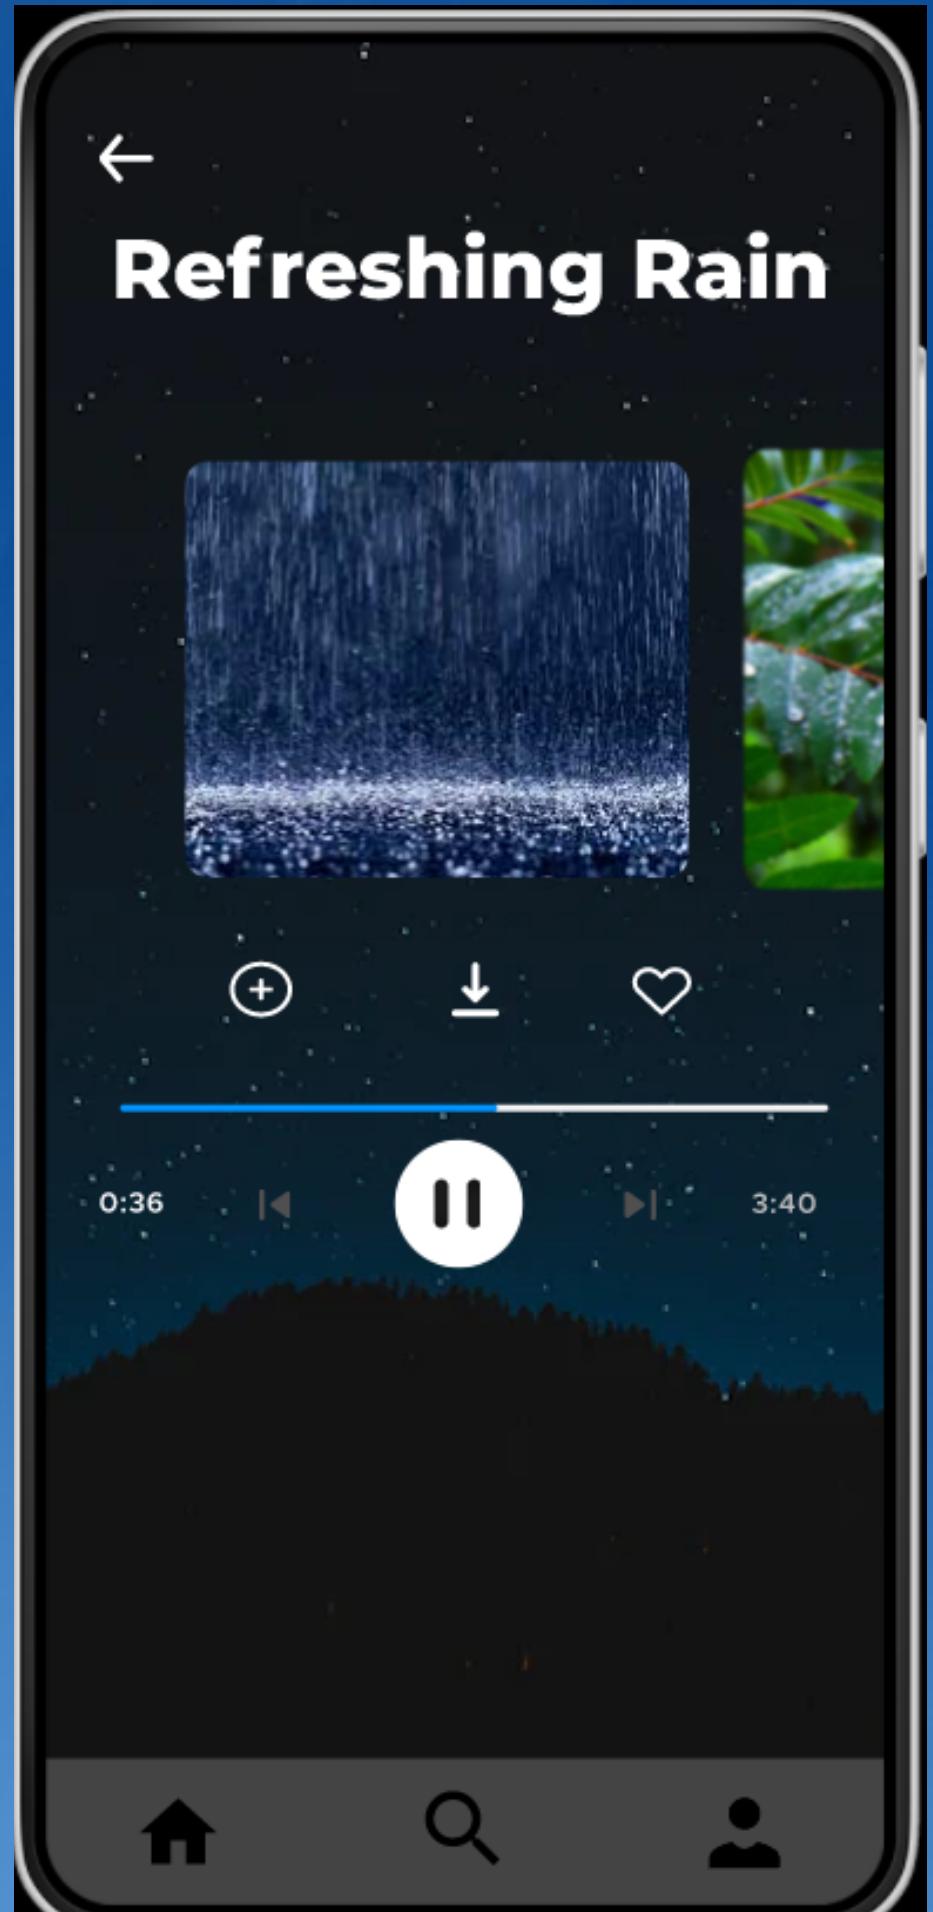

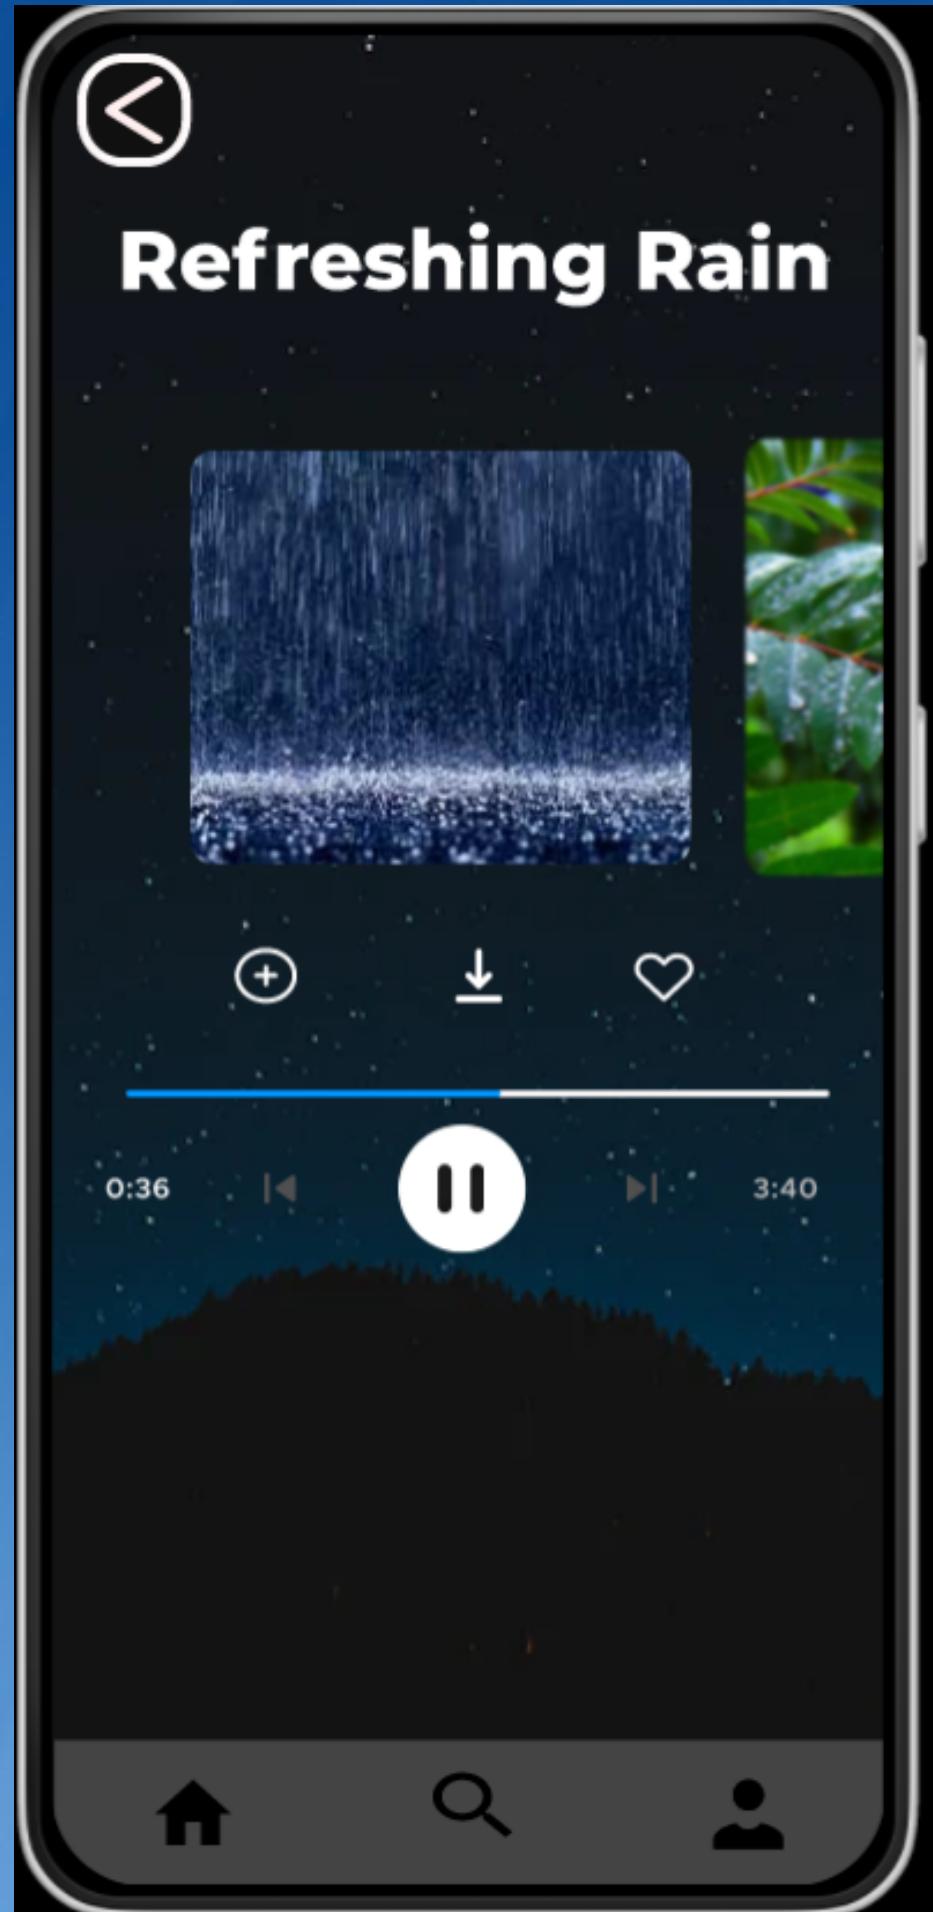

The sleep sounds user wants starts playing after clicking the option. User can drag or click on the next option to go to next sound.

## USABILITY ISSUE

The back button wasn't matching too much and there was prototyping error.

## IMPROVEMENT

A more realistic back button was made and prototyping error was diminished.

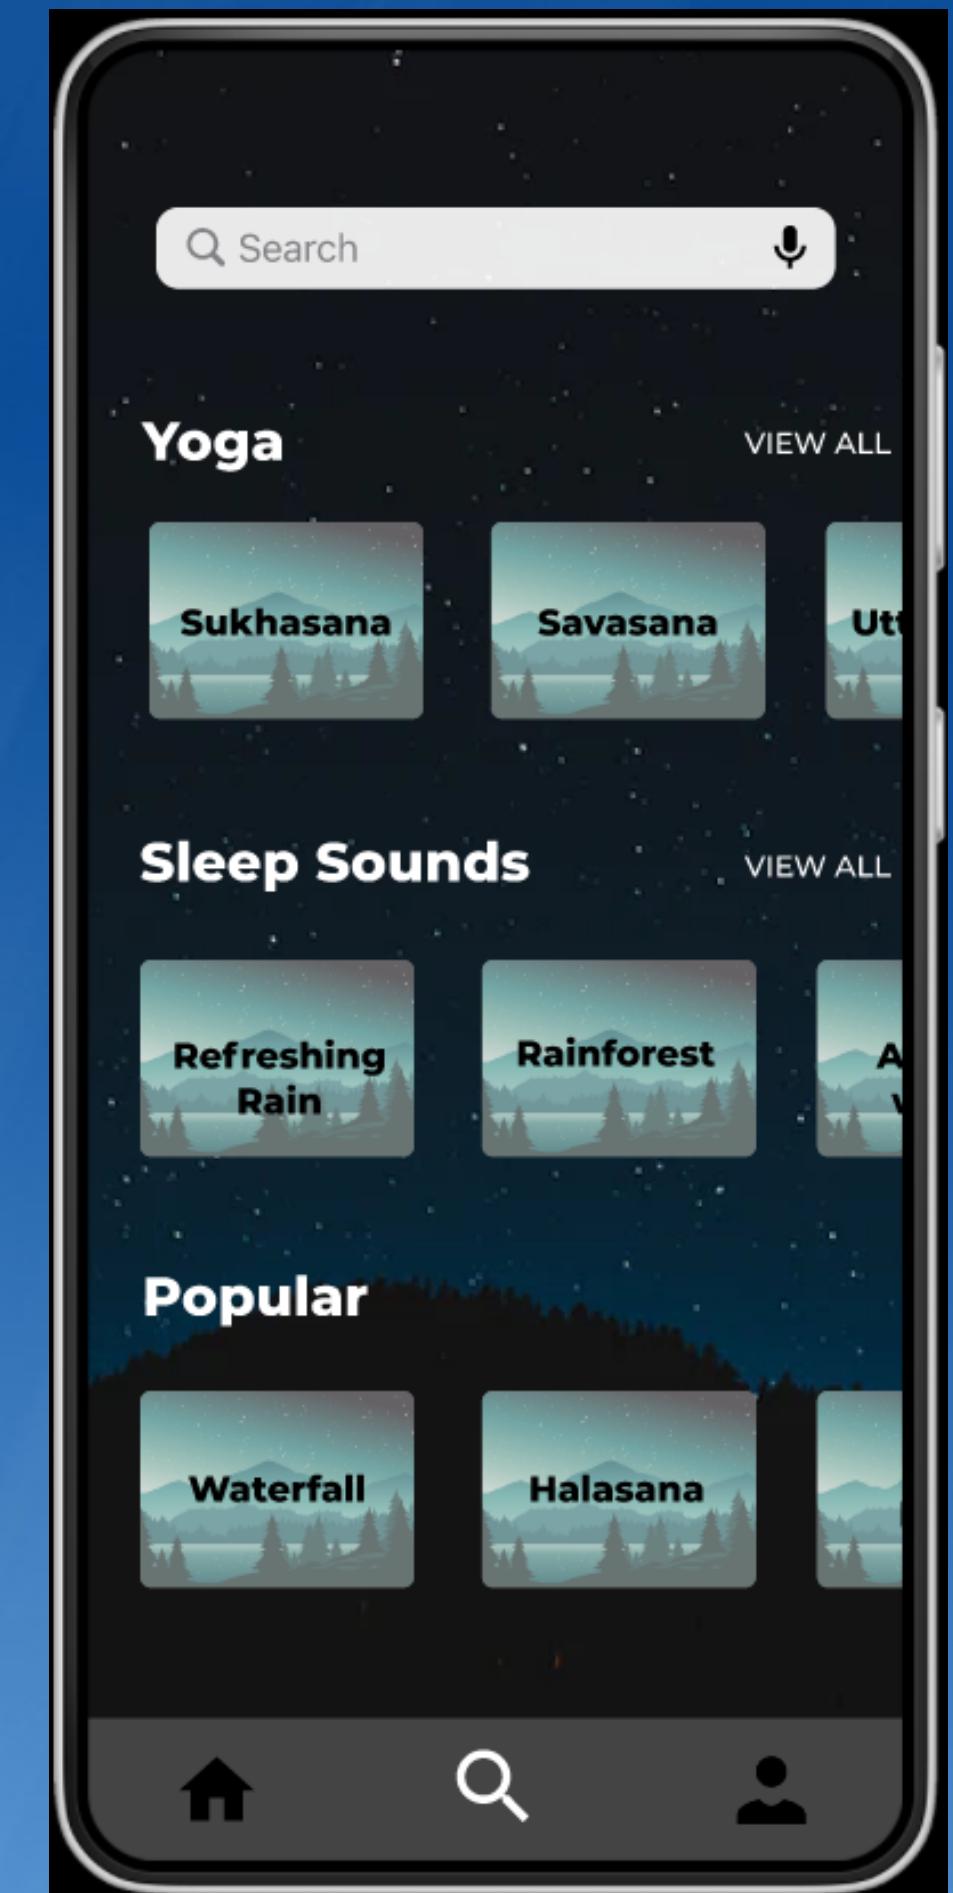

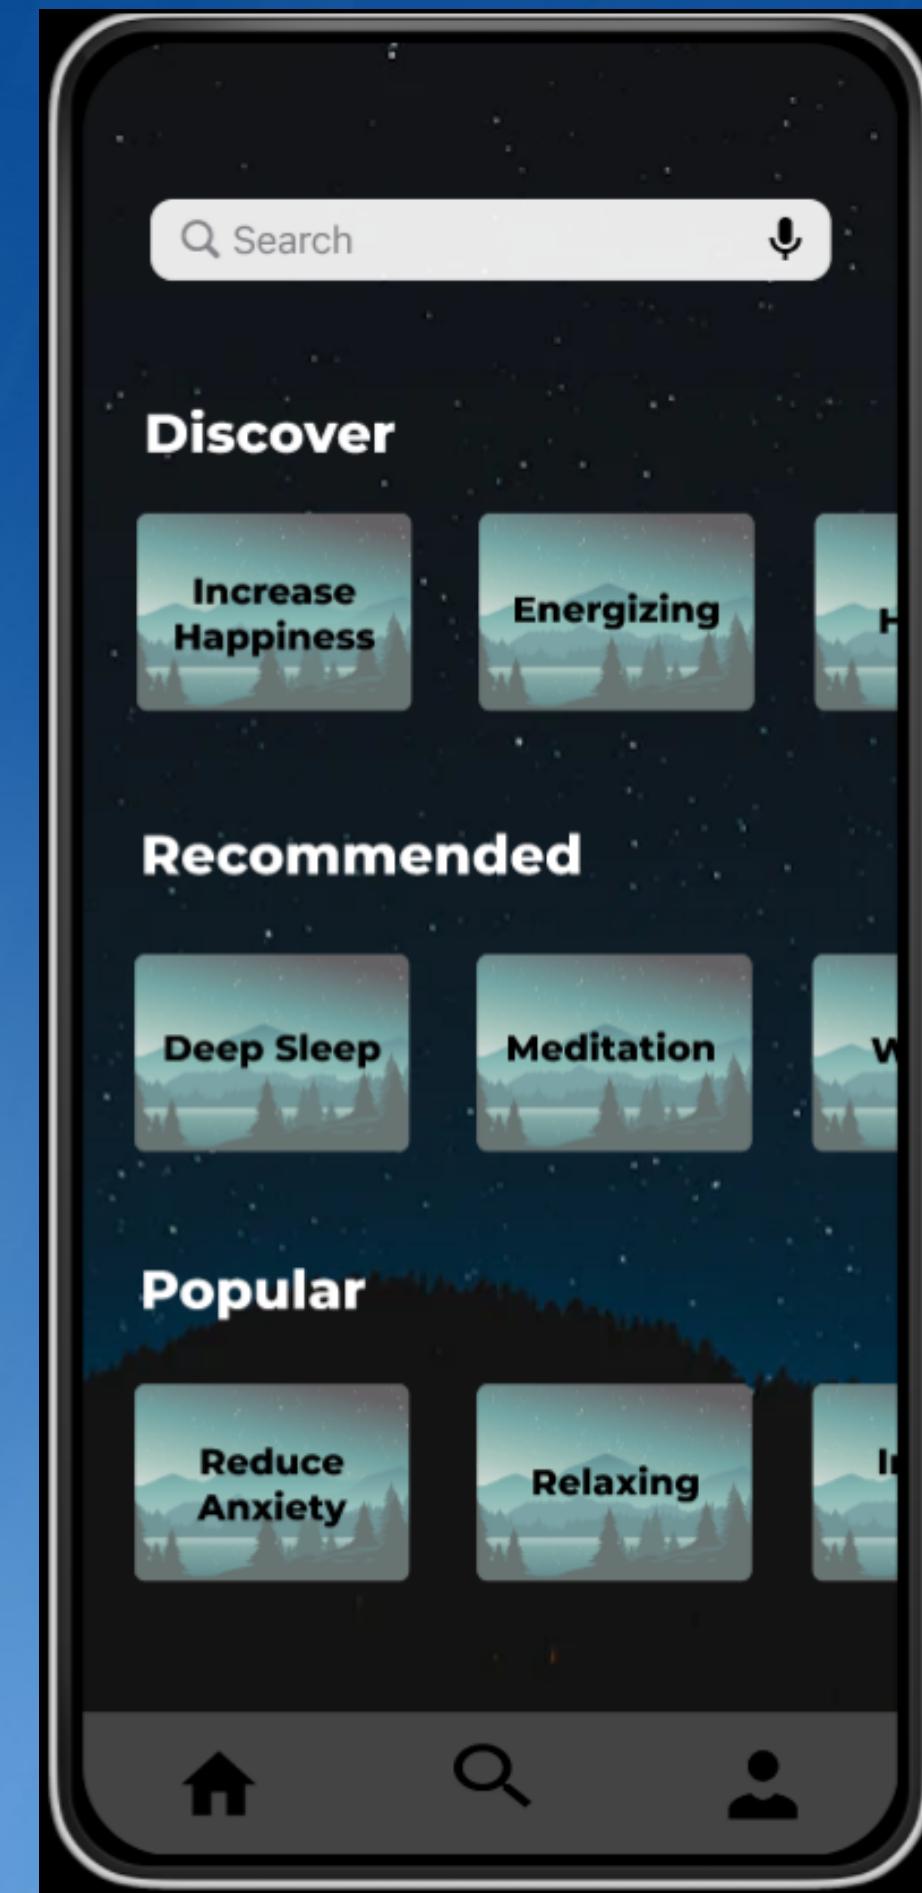

User clicks on the search button and can search the required feature directly.

## USABILITY ISSUE

User got confused in receiving info whether he would reach yoga or sound when click on increase happiness.

## IMPROVEMENT

More user friendly options were made.

User clicks on the goal feature option and now can add or delete their goals.

## USABILITY ISSUE

No back button was present.  
The notes made by user weren't shown as well as prototyping wasn't right.

## IMPROVEMENT

Back Button was added.  
Background of options were made more interactive.  
Prototyping was corrected.

# Let's Get Fabulous!

Which goal would you like to start with?

Feel more energized

Increase your productivity

Focus & concentrate more

Sleep better

# ← Let's Get Fabulous!

Focus & concentrate more  
YOUR PRESENT GOALS

Feel more energized

Increase your productivity

NOTE 1

NOTE 2

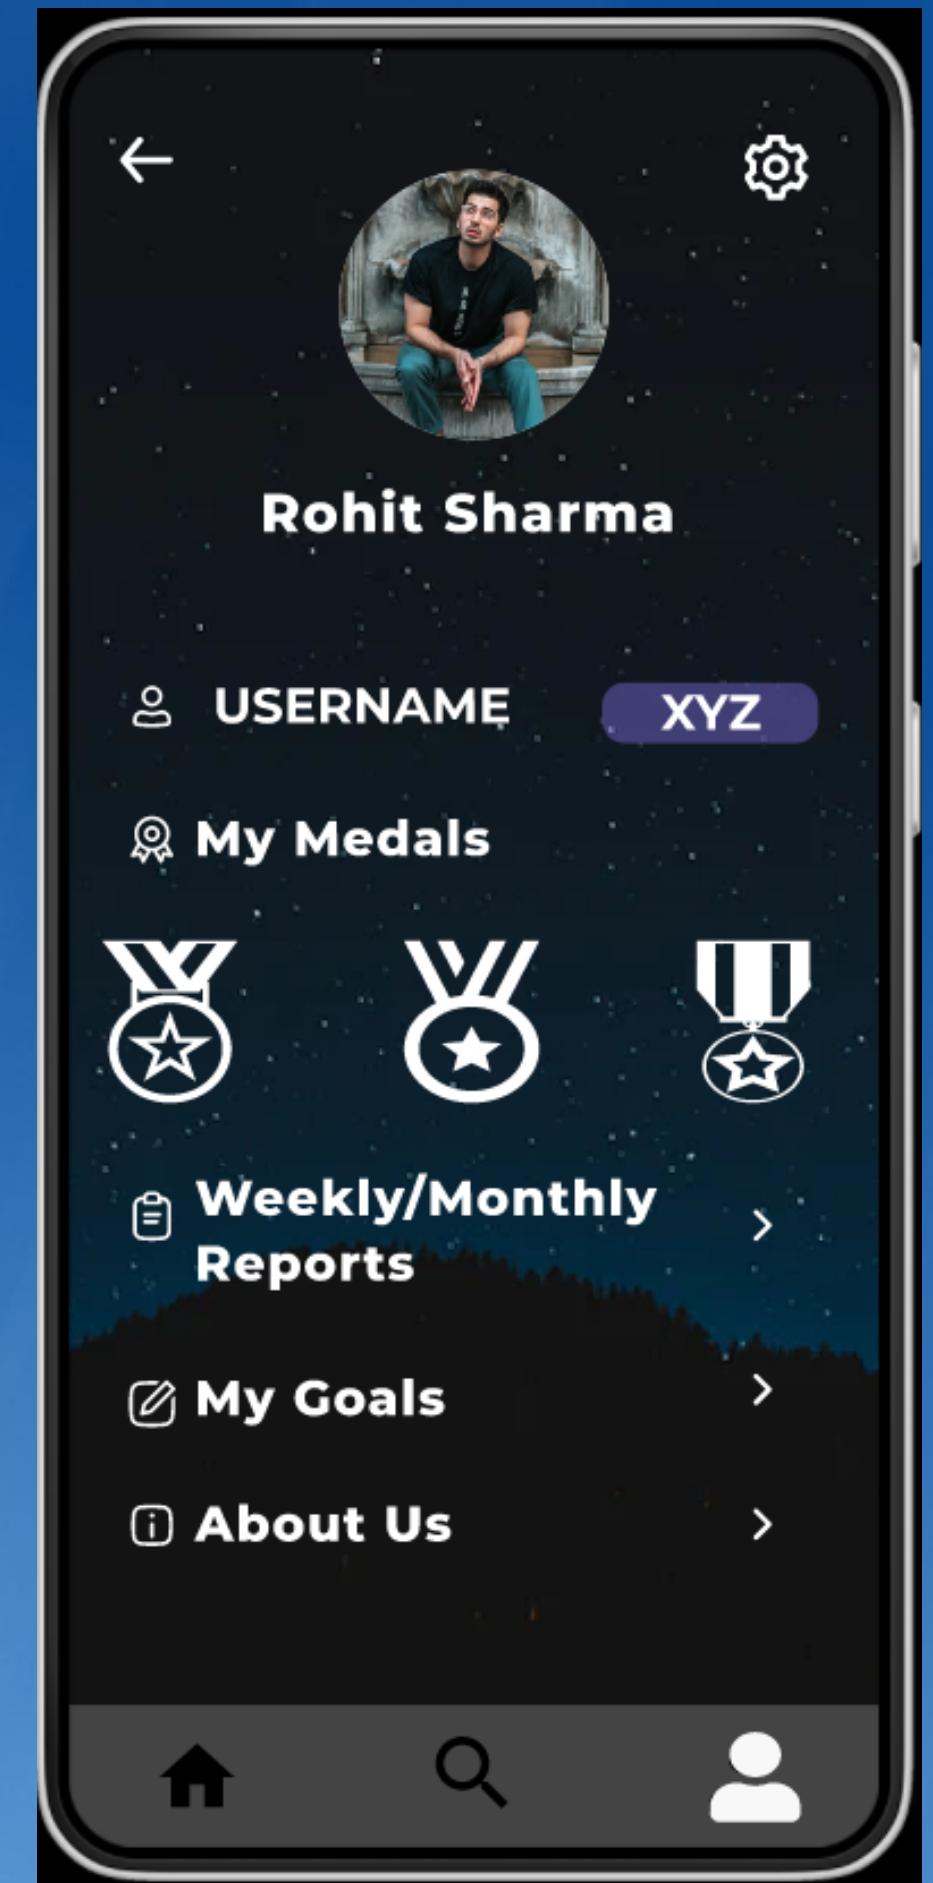

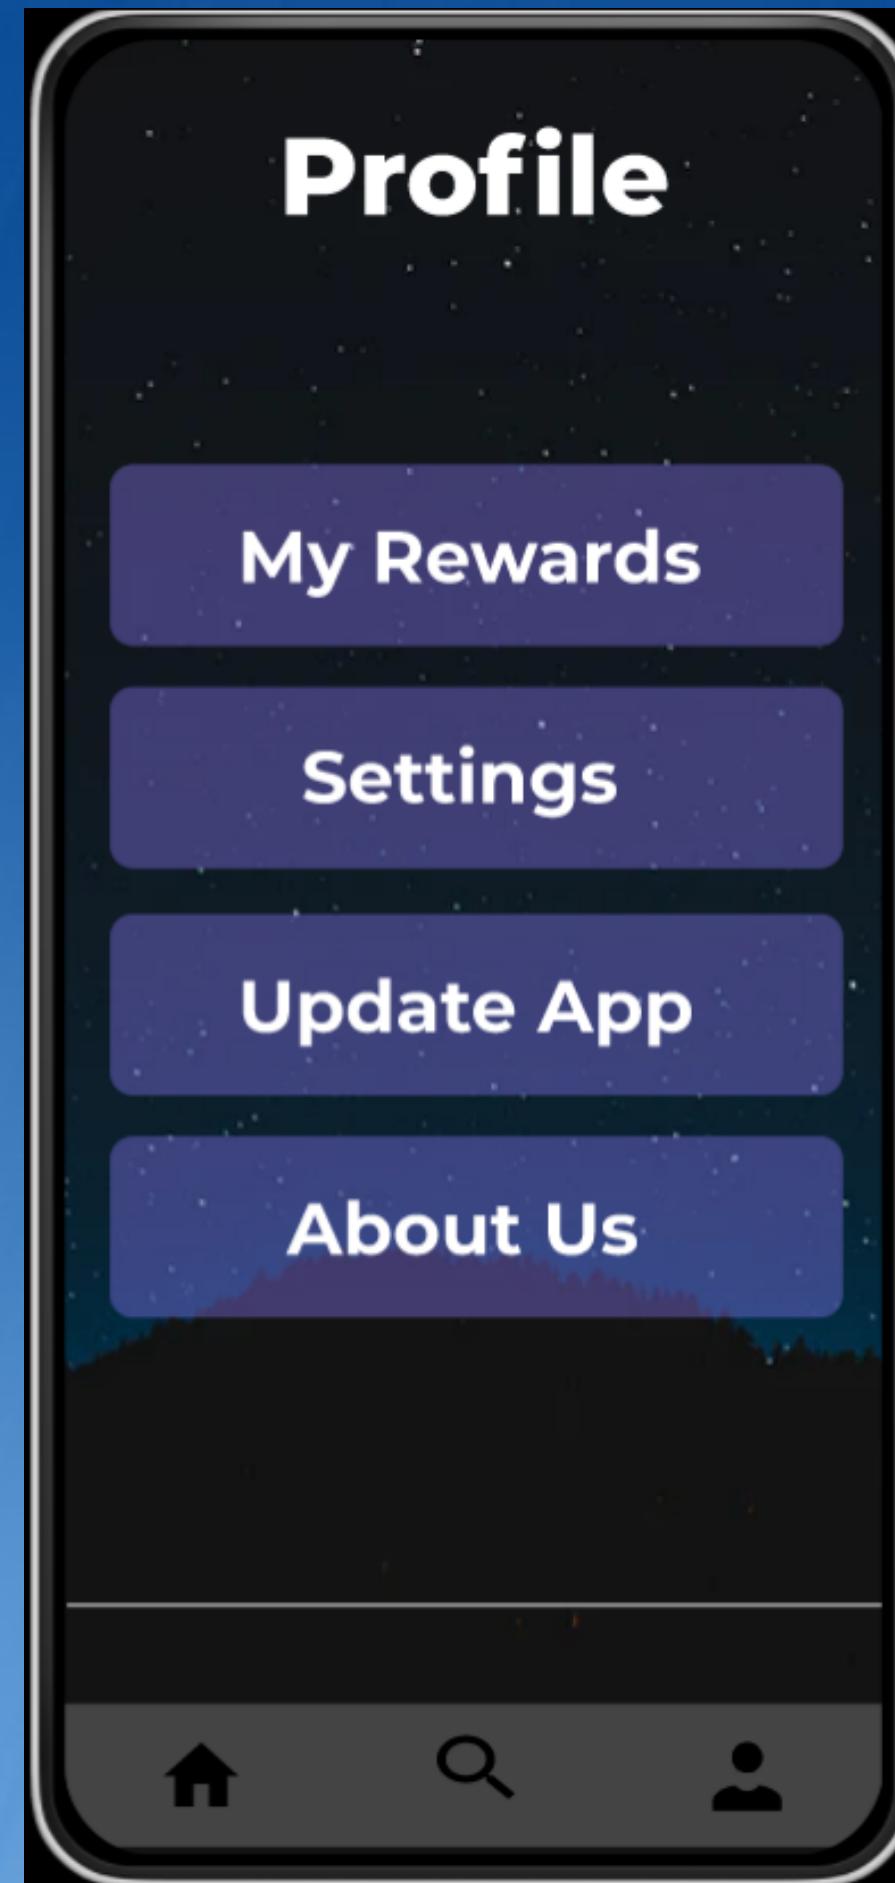

User clicks on the profile option present at the bottom of the screen and access the features.

## USABILITY ISSUE

User Interface wasn't attractive as well as no back button and much features were available.

## IMPROVEMENT

Back Button was added. User Image and many other useful features were added.

# 「 SOME FEEDBACK DATA 」

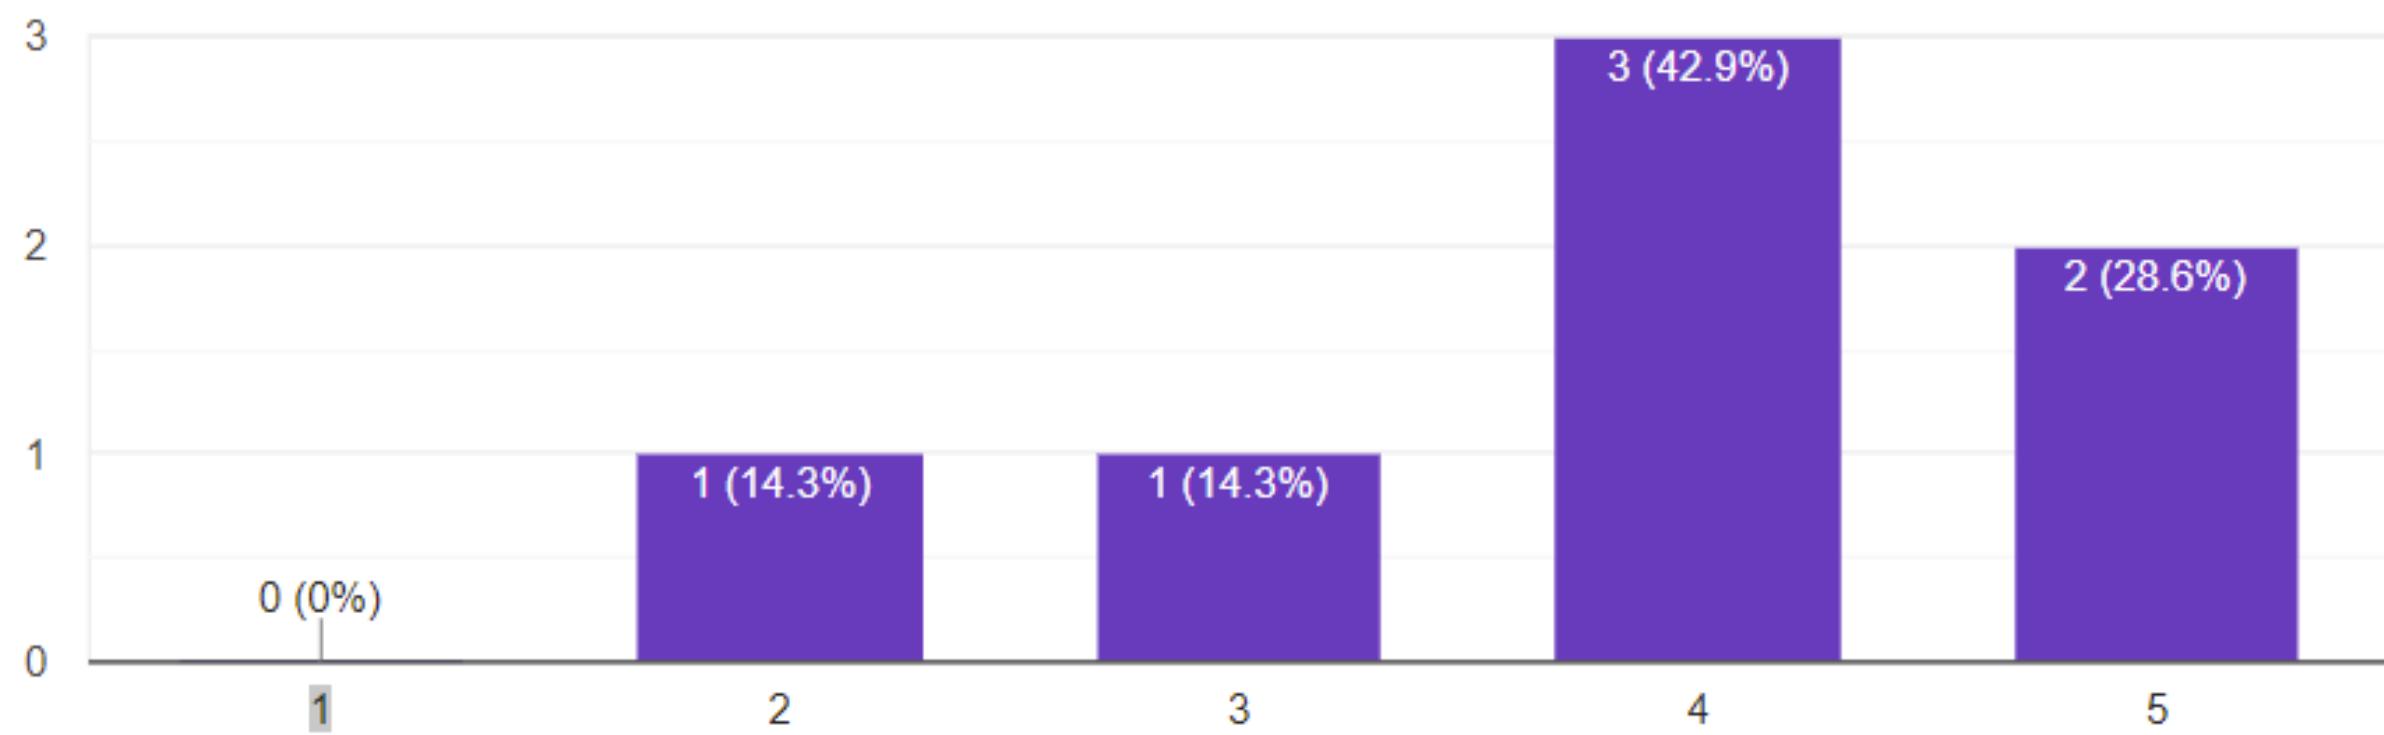

- NOTE :

The google form made was being filled by the respective evaluator as soon as they were asking questions from the user and getting the answers.

How interactive did the user find the app's interface?(overall)(Navigation Labels)

 Copy
